Managing People And Technological Change:

Managing Technological Change Nancy M. Lorenzi, Robert T. Riley, 2013-03-14 The successful implementation of health information systems in complex health care organizations ultimately hinges on the receptivity and preparedness of the user. Although the Information Age is well underway, user resistance to information systems is still a valid concern facing the informatics community. This book provides effective management strategies to health care administrators for the productive integration and maintenance of such information systems. The Second Edition covers three main areas: technical skills, project management skills, and organizational and people skills, including the practical implementation strategies necessary to make the system an operational success. The audience for this book consists of health care administrators, CEOs, clinicians, IT developers, librarians, and professors.

Management of Technological Change E.G. Frankel, 2012-12-06 Technological change has been recognized as the major contributor to economic growth and has become one of the most important challenges to policy makers and managers. Many excellent books and papers have been written on the subject. Most of these deal with the macro or micro economic impact of technological change or the technological change process from invention and discovery to innovation, development, and final maturity, as well as ultimate obsolescence of technology. This book is designed to present technological change as a decision process and explain the use of recently developed methods for the effective management of technological change. In particular, techniques for the effective choice among technological alternatives, timing of the introduction of new technology both in terms of its own status and that of the technology to be replaced, if any, and the rate and method of introduction of new technology are presented. Management of technology is a complex decision process which is affected by both internal and external factors. The purpose of this book is to instruct the reader in effective technology decision making which involves the evaluation of the status of technology in use, if any, the problem to be solved or output to be obtained, determination of environmental and internal constraints, and the competitive environment or market conditions which affect the technology decisions.

Managing People and Organizations in Changing Contexts Graeme Martin, 2006 *Managing People and Organizations in Changing Contexts* addresses the contemporary problems faced by managers in dealing with people, organizations, and managing change in a theoretically informed and practical way. This textbook is a contemporary and relevant alternative to the standard works that cover material on Organization Behaviour and Human Resource Management because it approaches people management from the perspective of managers and aspiring managers. The book has an international orientation and many of the cases and examples in the book reflect this. It addresses the problems that managers face in managing people in old and new economy organisations and is interdisciplinary in its approach, including contributions from management, organisational behaviour, HRM, strategy, marketing, and reputation management and technology. This text meets the requirements of managers, leaders, and students in managing people in contemporary and changing contexts. *Managing People and Organizations in Changing Contexts* offers a

contemporary and relevant edge with an original structure awareness of international and current trends and up to the minute detail cases based on original research and consulting experience new material on the role of management and leadership technology and reputation management and covers much of the material for CIPD's core management standards material that has been tested with managers and students in Europe the USA and Asia a website on <http://textbooks.elsevier.com> providing international cases and answers to cases links to websites etc for tutors
