PIONEER of AIR POWER

A BIOGRAPHY OF GENERAL "BILLY" MITCHELL
ISAAC DON LEVINE

Mitchell Pioneer Of Air Power

Lester Cohen, Emile Gauvreau

Mitchell Pioneer Of Air Power:

Mitchell, Pioneer of Air Power Isaac Don Levine, 1958 Biografi over og gennemgang af general Mitchells betydning for udviklingen af luftkrigsdoktriner *Billy Mitchell* Alfred F. Hurley, 1975 This is the best book the most scholarly the most judicial the best written about the intelligent attractive undiplomatic quixotic Billy Mitchell the legendary founder of today's United States Air Force Robert H Ferrell author of Harry S Truman A Life Revered by many Americans as a martyr for his cause Brigadier General William Billy Mitchell has been one of the least understood figures of modern military history His position as the dominant figure in American aviation from 1919 until his court martial in 1925 has made him the frequent subject of biography film and television but usually these portrayals have overemphasized the sensational elements of his story For Mitchell sensationalism was only a means of drawing attention to his farsighted ideas on aviation In Billy Mitchell he emerges as a man with a mission and a true pioneer of modern aviation a man whose ideas about leadership in aerial operations inspire and instruct today's airmen and women Anyone interested in aviation will delight in this compelling biography **Mitchell** Isaac Don Levine, 1943 **Flying Crusader** Isaac Don Levine, 1943 **William "Billy" Mitchell's Air Power**, 2004-09 In the fall of 1996 the Department of the Air Force published its vision for the twenty first century Air Force The vision entitled Global Engagement presented a new strategy to guide the Air Force in meeting the many challenges of the first quarter of the twenty first century It is a vision of air and space power and covers all aspects of our Air Force people capabilities and support structures Global Engagement is the first step in the Air Force's back to the present approach to long range planning As the Air Force charts its course into the twenty first century valuable insight is gained by examining the beginnings of that course the initial vector that has steered air power from its birth at the beginning of this century and will now carry air and space power into the next The United States Air Force is inseparably linked to many aviation pioneers and air power advocates The wisdom and vision of these early airmen have steered the development of air power throughout this century Among those early visionaries Brig Gen William Billy Mitchell was perhaps the most outspoken advocate of air power and an independent air force Mitchell was not only a pioneer in military aviation but an air power visionary He was among the earliest to realize the value of air power and to see not only the profound changes it brought to his times but its vast potential for the future His wisdom is as fresh and relevant today as it was at the beginning of the century when he offered it This collection of Mitchell's thoughts on air power offered here should illuminate the vision offered by Global Engagement Even though Mitchell set forth his thoughts nearly 80 years ago the lineage can be seen between his vision and those principles that have guided our Air Force in the past that guide our Air Force today and that will guide the Air Force vision for the next century Robert M Hylton Colonel USAF Commander College of Aerospace Doctrine Research and Education **Airpower Pioneers** John Andreas Olsen, 2023-01-15 Airpower Pioneers studies twelve especially influential airmen detailing their impact on the evolution of the United States Air Force USAF Rather than focus on

command in a series of air campaigns this book describes the personal qualities and careers of people who distinguished themselves first and foremost by advancing airpower theory doctrine and strategy and in certain cases by implementing significant organizational changes in the USAF structure Some held important positions during wartime but except for a few who excelled in both combat and peace those selected for inclusion in this volume made their main contributions to advancing aerospace power away from the front line as planners organizers educators and strategists The future of aerospace power requires airmen not only to push the limits in combat but also to emphasize publicly and frequently what is special and vital about airpower The distinctive characteristics of airpower speed range flexibility precision and lethality have improved with every new generation of aircraft and weapon systems The history of modern warfare is full of empirical evidence of airpower's relevance Looking ahead the main challenge for air forces all over the world is to match advances in technology with new ideas All air forces need visionary men and women whose reach exceeds their grasp who are determined to adapt to new security and defense realities rather than adhere to romanticized ideas of yesteryear and whose organizational skills ensure successful implementation of new ideas despite inevitable resistance to change

Master of Airpower David Mets, 2009-04-02 A valuable and long overdue biography of one of America's greatest soldiers Parameters The story of Gen Carl Tooey Spaatz's life is more than a biography of one of America's great military leaders It is a history of the development of airpower and a fascinating inside look at the long difficult struggle to win autonomy for the U S Air Force Spaatz earned his wings in 1918 when flying was a new and dangerous occupation aviation school mortality rates were 18 percent After gaining experience as a fighter pilot during the Great War he became one of the Air Corps top pursuit commanders during the 1920s During the 1930s he moved over to bombers just as modern long range aircraft were coming into service As a senior bomber commander Spaatz significantly influenced the emerging strategic bomber doctrine By the time of the outbreak of the Second World War Spaatz was one of America's most experienced aviators He was at the helm of the evolution of the new American military strategic airpower doctrine which proved to be a decisive factor in World War II After the Allied victory planning and launching an independent Air Force would occupy Spaatz for the remainder of his career Today's Air Force bears his indelible stamp Tooey Spaatz was a low profile leader who was known for his open mind and pragmatic approach and who was influential in a quiet forceful way Possessed of absolute integrity even when his beliefs were unpopular he pressed them at the risk of his career

Air Power and Warfare United States Air Force Academy. Library, 1978

Billy Mitchell: Founder of Our Air Force and Prophet Without Honor Lester Cohen, Emile Gauvreau, 2019-04-07 As early as 1920 US Army General Billy Mitchell began sounding alarm bells about an inevitable Japanese invasion from sea based aircraft Through the press and in person he lobbied naval brass about America's woefully unprepared defensive air power but his talk of dogfights over the Pacific with superior planes was laughed at and dismissed by all Mitchell's vision of a US Air Arm would have meant massive costly upgrades to the nation's dated flying machines

owned by private firms holding patents on aircraft machinery Old guard soldiers like John J Pershing dismissed as delusional ravings Mitchell s belief that a battleship could be destroyed by a bomber Mitchell s outspoken press conferences about an airplane trust supported by corrupt government officials led to his court martial for insubordination in 1925 He died in 1936 a man ahead of his times and hated for it **The Paths Of Heaven: The Evolution Of Airpower Theory: The School Of Advanced Airpower Studies** Philip S. Meilinger,2000
