Gerace, 2004 This is a book about how military spending and international trade interact among great powers about their peacetime patterns of conflict and about the peacetime roles played by military power **Military Engineering** George Dekoulis, 2020-02-19 This book Military Engineering is a collection of reviewed and relevant research chapters offering a comprehensive overview of the recent developments in the field of military engineering The book comprises single chapters authored by various researchers and edited by an expert active in the physical sciences engineering and technology research area All chapters are complete in themselves but united under a common research study topic This publication aims at providing a thorough overview of the latest research efforts by international authors on military engineering and opening new possible research paths for further novel developments *Gender Integration in NATO Military Forces* Lana Obradovic, 2016-04-15 Numerous states have passed gender integration legislation permanently admitting women into their military forces As a result states have dramatically increased women's numbers and improved gender equality by removing a number of restrictions Yet despite changes and initiatives on both domestic and international levels to integrate gender perspectives into the military not all states have improved to the same extent Some have successfully promoted gender integration in the ranks by erasing all forms of discrimination but others continue to impede it by setting limitations on equal access to careers combat and ranks

Why do states abandon their policies of exclusion and promote gender integration in a way that women's military participation becomes an integral part of military force? By examining twenty-four NATO member states, this book argues that civilian policymakers and military leadership no longer surrender to parochial gendered division of the roles but rather support integration to meet the recruitment numbers due to military modernization, professionalization, and technological advancements. Moreover, it proposes that increased pressure by the United Nations to integrate gender into security and NATO seeking standardization and consistency on the international level and women's movements on the domestic level are contributing to greater gender integration in the military.
