Fighters and Bombers of World War II , **P-38 Lightning vs Bf**

109 Edward M. Young, 2023-11-23 An exciting account of the aerial battles fought by the USAAF's P38 Lightnings and the Jagdflieger's Bf 109Gs for dominance over North Africa and the Mediterranean. USAAF fighter pilots experienced a baptism of fire when flying the technically advanced but fragile P 38 Lightning over North Africa in the wake of 1942's Operation Torch. Their opponents were battle-hardened Jagdflieger of the Jagdwaffe flying the tried and tested Bf 109 in its very latest iteration. Responsible primarily for escorting USAAF bombers attacking Afrika Korps installations in Tunisia, the P 38 units in North Africa had to develop effective tactics to defend the bombers against Luftwaffe fighter attacks. For several months the Lightning squadrons had to also cope with shortages of aircraft and spare parts, steady losses, and a lack of replacement pilots. To survive, American aviators had to learn quickly. While it is difficult to definitively attribute victories in air combat in the air battles over Tunisia and later over Sicily and Italy, the claims made by Lightning pilots were comparable to Luftwaffe claims for P 38s destroyed. Edward M. Young turns his attention to the bitterly fought air war in North Africa and the Mediterranean in 1942-43. Using original archival sources, official records, and first-hand accounts from both USAAF and Luftwaffe veterans, as well as newly commissioned artwork and 50 carefully selected photographs from official and personal archives, this book sees two of the most iconic piston-engined fighters of their era pitted head-to-head for control of the skies in a key theatre of World War II.

P-38 Lightning in Detail & Scale, Part 1 Bert Kinzey, 2024-12-23 The Germans called it *Der Gabelschwanz Teufel* or The Forked-tailed Devil. The Japanese referred to it as two planes with one pilot. But whatever it was, likened to the Lockheed P 38 Lightning, represented a giant step forward in combat aircraft design and technology. With its twin-engine, twin-boom design and a fuselage pod between the booms, the P 38 Lightning was a radically different design from any previous fighter aircraft. Its high speed and long range, coupled with its firepower being concentrated in the fuselage pod, made it one of the most formidable fighters of World War II. Ideally suited for operations in the Pacific, it scored more aerial victories in that theater than any other USAAF fighter. In 1998, Detail Scale published two books on the P 38 Lightning. These publications were very popular but have been out of print for quite some time. This publication, *P 38 Lightning in Detail and Scale, Part 1*, is the first of two newly expanded, updated, and revised editions of Detail Scale's previous two-part coverage of the Lightning. A considerable number of color photographs, both historical and detail in nature, have been added. The focus of this volume is on the so-called early Lightnings, beginning with the first XP 38 prototype and continuing through the P 38H. Also included are the related F 4, F 4A, and F 5A photographic reconnaissance variants. When it first flew in 1939, the Lightning was larger, faster, and more heavily armed than any fighter aircraft in the world. Early variants of the P 38 found themselves thrust into combat as the United States entered World War II. In Europe, early Lightnings were plagued with problems associated with British fuels interacting with their exhaust-driven turbo-supercharged engines at high altitudes. Elsewhere, in northern Africa, the Mediterranean, the Aleutians, and throughout the Pacific, the P 38 performed far more effectively and produced outstanding results in combat. America's top two aces of World War II, Richard Bong and

Thomas McGuire scored all of their victories in the large P 38 while flying against smaller more nimble Japanese aircraft known for their maneuverability More than one hundred other aces scored all or most of their victories in the Lightning This publication features expanded and revised historical overviews of the P 38s along with detailed descriptions of each P 38 variant The Early Lightning Details chapter also features new and expanded content compared to the original 1998 book The chapter is illustrated with scores of detailed and meticulously restored photographs accompanied by captions that illustrate both important features and subtle differences between P 38 variants Some of these images are original archival material while others were chosen from hundreds of photos taken specifically for this book by the authors and their contributors Of note the Lightning Details chapter in P 38 Lightning in Detail and Scale Part 1 features photos of the P 38F Glacier Girl to be found nowhere else This P 38 was recovered from under the Greenland ice pack in 1992 Bert Kinzey took these photos during the restoration of Glacier Girl in 1998 and the photographs illustrate the details of the Lightning that would otherwise be difficult or impossible to represent As with all of our publications in the Detail Scale Series the book concludes with a Modelers Section that features reviews of the plastic model kits of these early P 38 variants Each review impartially and objectively highlights each kit s strengths and weaknesses along with ways that a scale modeler can correct or improve upon accuracy and details P 38 Lightning in Detail Scale Part 1 contains over 200 high resolution photographs along with dozens of detailed line drawings of the P 38 variants covered The Early Lightning Details Chapter alone has 122 photographs

P-38 Lightning in Detail & Scale, Part 2 Haagen Klaus,Bert Kinzey,2024-12-24 Lockheed s P 38 Lightning was a unique aircraft even on the drawing board When the prototype XP 38 first flew in January 1939 it was the fastest fighter plane of its day It also possessed the longest range and had the heaviest armament of any fighter Each subsequent version improved upon the preceding one Early versions of the Lightning faced significant operational issues British fuels in the United Kingdom had some incompatibilities with the P 38 s exhaust driven turbo supercharged engines In all theaters the early Lightnings dealt with high speed compressibility issues and chronic engine cooling problems The compressibility and engine cooling issues were overcome with the late Lightning variants first delivered to the U S Army Air Forces in August 1943 These aircraft were the most refined and definitive P 38s They played no small role in the successful conclusion of World War II by the Allies especially in the Pacific Theater In 1998 Detail the P 38J through P 38M variants the F 5B through F 5G photo recon aircraft and the Droop Snoot and Pathfinder special purpose variants The XP 49 and XP 58 which were based on the Lightning are also briefly examined This publication features expanded and revised historical overviews of the later model P 38s along with detailed descriptions of each variant Also included are numerous line drawings created by Lloyd Jones specifically for Detail Scale that point out the specific changes made to each variant as the design was continuously improved The Late Lightning Details chapter features new and expanded content compared to the original 1998 book The chapter is illustrated with scores of detailed and meticulously restored photographs accompanied by captions that explain both

important features and subtle differences between P 38 variants While some of these images are original archival material the great majority were chosen from hundreds of photos taken specifically for this book by the authors and their contributors As is the case in all volumes in the Detail Scale Series a Modelers Section provides comprehensive reviews of the plastic model kits of the featured aircraft Since the original release of this publication the world of P 38 scale modeling has been particularly impacted by the release of the Tamiya 1 48th scale P 38J and the Trumpeter 1 32nd scale P 38L These kits and many more dating back to the 1960s are examined in depth Recommendations are made as to which kits in each scale are best and suggestions for corrections and improvements are presented P 38 Lightning in Detail Scale Part 2 contains 270 high resolution photographs almost 190 of which are in color The details chapter alone has 169 photos including 145 color images
