**Pop Bottle Science** Lynn Brunelle, 2004-09-01 It's pure bottled magic! A science experiment kit that's as much fun as a bubbly soda. Pop Bottle Science presents 79 easy hands-on experiments that probe the worlds of chemistry, physics, biology, geology, weather, the human body, and even astronomy. It's a book and kit all packaged in a bottle that makes a perfect miniature science lab: see-through, flexible, airtight when necessary, made out of a durable shatter-proof plastic and designed with a removable top that doubles as a funnel. In the kit is a lively, fully illustrated 96-page guide to astonishing and easy science experiments to perform at home with materials you have on hand. Each experiment begins with a challenge and ends with an explanation of the scientific principles involved. Kids can design a volcano and watch it erupt, create a tornado maker and see how twisters work, make quicksand, is it solid or liquid? Observe photosynthesis in action. Simulate Jupiter's giant red spot, investigate buoyancy, demonstrate inertia, and discover the Bernoulli principle which allows planes to fly. Plus, turn the bottle into a barometer, a thermometer, walkie-talkie, trombone, compass, or groovy lava lamp. Kit also contains tools for the science experiments: measuring cup, balloons, and a cork bottle stopper.
