society are brought to bear upon one man's ambition and his attempt to escape his own socio-economic hell. The world's ecosystems have been destroyed by genetic pollution and cities have evolved into mega malls. Budgie is a knife-wielding, brass-knuckled young man from the impoverished and brutal red section of Toronto's T-Dot Center. When his best friend is ordered and Budgie falls in love with the woman responsible, he learns that there's more to life than drugs, blood, or money. To escape his past, he must give up everything and everyone he knows and sell his perceptions to an enigmatic and dangerous gang leader. Fighting for survival and unwittingly involved in a scheme that only he can stop, Budgie must ask himself: Does he want to?

Technicolor Ultra Mall is an ultra-violent science-fiction dystopic novel about the value of being human in a completely commodified world.

Operation of Mind in Nature Chris Nash, 2004-06-01. Words held for ransom in exchange for meaning. Synopsis: The Answers to a Universe Lost in a Game of lesser Gods.

Designing with the Mind in Mind Jeff Johnson, 2013-12-17. In this completely updated and revised edition of *Designing with the Mind in Mind*, Jeff Johnson provides you with just enough background in perceptual and cognitive psychology that user interface (UI) design guidelines make intuitive sense rather than being just a list of rules to follow. Early UI practitioners were trained in cognitive psychology and developed UI design rules based on it. But as the field has evolved since the first edition of this book, designers enter the field from many disciplines. Practitioners today have enough experience in UI design that they have been exposed to design rules, but it is essential that they understand the psychology behind the rules in order to effectively apply them. In this new edition, you'll find new chapters on human choice and decision making, hand-eye coordination, and attention, as well as new examples, figures, and explanations throughout. Provides an essential source for user interface design rules and how, when, and why to apply them. Arms designers with the science behind each design rule, allowing them to make informed decisions in projects and to explain those decisions to others. Equips readers with the knowledge to make educated tradeoffs between competing rules, project deadlines, and budget pressures. Completely updated and revised, including additional coverage on human choice and decision making, hand-eye coordination, and attention, and new mobile and touch screen examples throughout.
