Popeye At Sea:

Popeye Fred M. Grandinetti, 2004-08-12 It is a rare comic character who can make audiences laugh for well over half a century but then again it is a pretty rare cartoon hero who can boast of forearms thicker than his waist who can down a can of spinach in a single gulp or who generally faces the world with one eye squinted completely shut When E C Segar's gruff but lovable sailor man first tooted his pipe to the public on January 7 1929 it was not in the animated cartoon format for which he is best known today and which would become the longest running series in film history Instead it was on the comics page of the New York Journal as Segar's Thimble Theatre strip Over the decades to come Popeye was to appear on radio television stage and even in a live action feature film This comprehensive and lavishly illustrated history is a thoroughly updated and revised edition of the highly acclaimed 1994 work Animated series and films are examined noting the different directions each studio took and the changing character designs of the Popeye family Popeye in other media comics books radio and a stage play is thoroughly covered as are Robert Altman's 1980 live action film and Popeye memorabilia **Merchant**

comprehensive examination of historical Norwegian and allied airborne maritime surveillance operations in the North Atlantic after World War II until the present Russia's resurgent naval and submarine activity in the High North needs to be closely observed Norway together with her closest allies have monitored such activity in the High North since the end of World War II One of the key instruments in that effort has been Maritime Patrol Aircraft MPA with their Anti Submarine Warfare ASW capabilities However after the Cold War in many nations an atrophy took place within the MPA communities of knowledge resources and experience with airborne ASW This occurred just as the concept of intelligence surveillance and reconnaissance ISR came to play an increasingly important role in modern warfare but without sufficient attention being paid

to the specific challenges of maritime airborne surveillance and reconnaissance This book addresses that gap and examines the entwined evolution of airborne maritime surveillance by MPA and ASW in the High North both during and after the Cold War with the main focus being on Norway The discussion identifies the fundamental building blocks of these historical surveillance operations through a portrayal of the development of airborne surveillance and reconnaissance operations These building blocks are then applied to make recommendations for the future for maritime surveillance in the High North This book will be of much interest to students of naval history strategic studies intelligence studies Nordic studies and International Relations
