**Social Movement Dynamics** Federico M. Rossi, Marisa von Bülow, 2016-03-03 This book presents an overview of new approaches to the study of social movements emerging out of Latin America based on original and innovative analyses of the recent changes in collective action across the region Over the past decade new repertoires of contention have emerged in parallel to changes in the configuration of actors in previously established patterns of relationship between social movements and political institutions and in the shapes of collaborative networks both domestic and transnational The authors analyze a broad set of countries and social movements while focusing on three key theoretical debates the interactions between routine and contentious politics the relationship between protest and context and the organizational configurations of social movements The research agenda put forward by this book is neither defined nor restricted by geographical boundaries even though the chapters are based on field research undertaken in Latin America In doing so this volume contributes to a still underdeveloped dialogue in theory building in social movement studies among scholars from the South and from the North as well as among scholars specialized in different regions

A Transnational History of the Australian Animal Movement, 1970-2015 Gonzalo Villanueva, 2017-10-20 This book offers the first transnational historical study of the creation, contention and consequences of the Australian animal movement. Largely inspired by Peter Singer and his 1975 book *Animal Liberation*, a new wave of animal activism emerged in Australia and across the world. In an effort to draw public and media attention to the plight of animals such as the rearing of pigs and poultry in factory farms and the export of live animals to the Middle East and South East Asia, Australian activists were often innovative and provocative in how they made their claims. Through lobbying, disruptive methods and vegan activism, the animal movement consistently contested the politics and culture of how animals were used and exploited. Australians not only observed and learnt from people and events overseas but also played significant international roles. This book examines the complex and conflicting consequences of the animal movement for Australian politics as well as its influence on broader social change.

Social Media in Iran David M. Faris, Babak Rahimi, 2015-11-20 First comprehensive account of how the Internet has impacted life in Iran. Social Media in Iran is the first book to tell the complex story of how and why the Iranian people, including women, homosexuals, dissidents, artists, and even state actors, use social media technology and in doing so create a contentious environment wherein new identities and realities are constructed. Drawing together emerging and established scholars in communication culture and media studies, this volume considers the role of social media in Iranian society, particularly the time during and after the controversial 2009 presidential election, a watershed moment in the postrevolutionary history of Iran. While regional specialists may find studies on specific themes useful, the aim of this volume is to provide broad narratives of actor-based conceptions of media technology, an approach that focuses on the experiential and social networking processes of digital practices in the information era, extended beyond cultural specificities. Students and scholars of regional and media studies will find this volume rich with empirical and theoretical insights on the subject of how technologies shape political and everyday life.
