over forty years *The Cambridge Companion to Bob Dylan* brings fresh insights into the imposing range of Dylan's creative output. The first Part approaches Dylan's output thematically tracing the evolution of Dylan's writing and his engagement with American popular music, religion, politics, fame, and his work as a songwriter and performer. Essays in Part II analyse his landmark albums to examine the consummate artistry of Dylan's most accomplished studio releases. As a writer, Dylan has courageously chronicled and interpreted many of the cultural upheavals in America since World War II. This book will be invaluable both as a guide for students of Dylan and twentieth century culture and for his fans providing a set of new perspectives on a much loved writer and composer. *The Cognition of Basic Musical Structures* David

Temperley, 2004-08-20 In this book David Temperley addresses a fundamental question about music cognition: how do we extract basic kinds of musical information such as meter, phrase structure, counterpoint, pitch spelling, harmony, and key from music as we hear it? Taking a computational approach, Temperley develops models for generating these aspects of musical structure. The models he proposes are based on preference rules which are criteria for evaluating a possible structural analysis of a piece of music. A preference rule system evaluates many possible interpretations and chooses the one that best satisfies the rules. After an introductory chapter, Temperley presents preference rule systems for generating six basic kinds of musical structure: meter, phrase structure, contrapuntal structure, harmony, and key, as well as pitch spelling, the labeling of pitch events with spellings such as A flat or G sharp. He suggests that preference rule systems not only show how musical structures are inferred but also shed light on other aspects of music. He substantiates this claim with discussions of musical ambiguity, retrospective revision, expectation, and music outside the Western canon: rock and traditional African music. He proposes a framework for the description of musical styles based on preference rule systems and explores the relevance of preference rule systems to higher level aspects of music such as musical schemata, narrative and drama, and musical tension.
