to interpret the mystery inevitably casts doubt on the reader's similar attempt to make sense of the text and the world. Detecting Texts includes an introduction by the editors that defines the metaphysical detective story and traces its history from Poe's classic tales to today's postmodernist experiments. In addition to the editors, contributors include Stephen Bernstein, Joel Black, John T. Irwin, Jeffrey T. Nealon, and others.

Writing, Politics and Change in South Africa after Apartheid Christopher Warnes, 2023-06-08. This book shows how South African writing can help us to understand change after apartheid. It aims to shift the attention of literary criticism away from a narrow set of highbrow South African authors and towards a wider range of texts including popular fiction. The object of analysis at its largest level is the South African polity as it veered between the hopeful optimism of the Rainbow Nation under Nelson Mandela, the murderous muddling of Thabo Mbeki, and the captured state under Jacob Zuma. Questions of a political, economic, and sociological cast are central, with changes in the workplace, land reform, indigenous knowledge, xenophobia, corruption, and crime providing specific points of focus. Writing Politics and Change in South Africa after Apartheid shows how creative literature of the post-apartheid period has a unique and powerful capacity to illuminate these issues and to intervene in our understanding of them.

Cultural Rights Celia Lury, 2002-11-01. Cultural Rights aims to combine sociology of culture and cultural studies approaches to provide an innovative interpretation of contemporary culture. It develops Walter Benjamin's arguments on the effects of mechanical reproduction by seeing what has happened to originality and authenticity in postmodern culture. One aspect of this culture is that reproduction and simulation have become listless, so that distinguishing what is real from what is fabricated is a problem of daily life for everyone. Celia Lury establishes a clear framework for studying these matters by comparing a regime of cultural rights ordered by copyright, authorship, and originality with one defined by trademark, branding, and simulation. This move is illustrated through concise and accessible histories of three major cultural technologies: print, broadcasting, and information technology, and the presentation of research into the contemporary culture industry. The gendered dimensions of this transformation are explored by looking at the significance of the category of women in the process of cultural reproduction.

Degeneration, Culture and the Novel William M. Greenslade, 1994-04-28. An exploration of the impact of degeneration theories on British culture and fiction.

Liminality in Fantastic Fiction Sandor Klapcsik, 2012-01-09. This critical work diversifies Victor Turner's concept of liminality, a basic category of postmodernism in which distinct categories and hierarchies are questioned and limits erode. Liminality involves an oscillation between cultural institutions, genre conventions, narrative perspectives, and thematic binary oppositions. Grounded on this notion, the text investigates the liminality in Agatha Christie's detective fiction, Neil Gaiman's fantasy stories, and Stanislaw Lem's and Philip K. Dick's science fiction. Through an examination of destabilized norms, this analysis demonstrates that liminality is a key element in the changing trends of fantastic texts.
