Population And Nutrition An Essay On European Demographic History:

Population and Nutrition Massimo Livi-Bacci, 1991-01-31 From the time of Malthus the insufficient supply of food resources has been considered the main constraint of population growth and the main factor in the high mortality prevailing in pre industrial times In this essay the mechanisms of biological social and cultural nature linking subsistence mortality and population and determining its short and long term cycles are discussed The author s analysis examines the existing evidence from the century of the Great Plague to the industrial revolution interpreting the scanty quantitative information concerning caloric budgets and food supply prices and wages changes in body height and epidemiological history demographic behaviours of the rich and of the poor The emerging picture sheds doubts on the existence of a long term interrelation between subsistence of nutritional levels and mortality showing that the level of the latter was determined more by the epidemiological cycles than by the nutritional level of the population

The Routledge History of Death since 1800

Peter N. Stearns, 2020-10-13 The Routledge History of Death Since 1800 looks at how death has been treated and dealt with in modern history the history of the past 250 years in a global context through a mix of definite often quantifiable changes and a complex qualitative assessment of the subject The book is divided into three parts with the first considering major trends in death history and identifying widespread patterns of change and continuity in the material and cultural features of death since 1800 The second part turns to specifically regional experiences and the third offers more specialized chapters on key topics in the modern history of death Historical findings and debates feed directly into a current and prospective assessment of death as many societies transition into patterns of ageing that will further alter the death experience and challenge modern reactions Thus a final chapter probes this topic by way of introducing the links between historical experience and current trajectories ensuring that the book gives the reader a framework for assessing the ongoing process as well as an understanding of the past Global in focus and linking death to a variety of major developments in modern global history the volume is ideal for all those interested in the multifaceted history of how death is dealt with in different societies over time and who want access to the rich and growing historiography on the subject Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Cambridge Economic History of the Greco-Roman World

Walter Scheidel, Ian Morris, Richard P. Saller, 2007-11-29 In this the first comprehensive survey of the economies of classical antiquity twenty eight chapters summarise the current state of scholarship in their specialised fields and sketch new directions for research They reflect a new interest in economic growth in antiquity and develop new methods for measuring economic development often combining textual and archaeological data that have previously been treated separately

Encyclopedia of Historians and Historical Writing Kelly Boyd, 2019-10-09 The Encyclopedia of Historians and Historical Writing contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from

Herodotus to Simon Schama Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from related disciplines like Jürgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate Additionally the Encyclopedia includes some 200 essays treating the development of national regional and topical historiographies from the Ancient Near East to the history of sexuality In addition to the Western tradition it includes substantial assessments of African Asian and Latin American historians and debates on gender and subaltern studies

The Origins of Political Order Francis Fukuyama, 2011-04-12 A landmark history of the origins of modern democratic societies by one of our most important political thinkers A New York Times Notable Book for 2011 A Globe and Mail Best Books of the Year 2011 Title A Kirkus Reviews Best Nonfiction of 2011 title Virtually all human societies were once organized tribally yet over time most developed new political institutions which included a central state that could keep the peace and uniform laws that applied to all citizens Some went on to create governments that were accountable to their constituents We take these institutions for granted but they are absent or are unable to perform in many of today's developing countries with often disastrous consequences for the rest of the world Francis Fukuyama author of the bestselling *The End of History and the Last Man* and one of our most important political thinkers provides a sweeping account of how today's basic political institutions developed The first of a major two volume work *The Origins of Political Order* begins with politics among our primate ancestors and follows the story through the emergence of tribal societies the growth of the first modern state in China the beginning of the rule of law in India and the Middle East and the development of political accountability in Europe up until the eve of the French Revolution Drawing on a vast body of knowledge history evolutionary biology archaeology and economics Fukuyama has produced a brilliant provocative work that offers fresh insights on the origins of democratic societies and raises essential questions about the nature of politics and its discontents

The Climate of Rebellion in the Early Modern Ottoman Empire Sam White, 2011-08-15 *The Climate of Rebellion in the Early Modern Ottoman Empire* explores the serious and far reaching impacts of Little Ice Age climate fluctuations in Ottoman lands This study demonstrates how imperial systems of provisioning and settlement that defined Ottoman power in the 1500s came unraveled in the face of ecological pressures and extreme cold and drought leading to the outbreak of the destructive Celali Rebellion 1595-1610 This rebellion marked a turning point in Ottoman fortunes as a combination of ongoing Little Ice Age climate events nomad incursions and rural disorder postponed Ottoman recovery over the following century with enduring impacts on the region's population land use and economy

Food In Global History Raymond Grew, 2018-02-19 Social scientists study food in many different ways Historians have most often studied the history of specific foods anthropologists have emphasized the role of food in religious rituals and group identities sociologists have looked primarily at food as an indicator of social class and a factor in social ties and nutritionists have focused on changing patterns of consumption and applied medical knowledge to study the effects of

diet on public health Other scholars have studied the economic and political connections surrounding commerce in food Here these perspectives are brought together in a single volume

The Great Transition Bruce M. S. Campbell, 2016-06-23 In the fourteenth century the Old World witnessed a series of profound and abrupt changes in the trajectory of long established historical trends Transcontinental networks of exchange fractured and an era of economic contraction and demographic decline dawned from which Latin Christendom would not begin to emerge until its voyages of discovery at the end of the fifteenth century In a major new study of this Great Transition Bruce Campbell assesses the contributions of commercial recession war climate change and eruption of the Black Death to a far reaching reversal of fortunes from which no part of Eurasia was spared The book synthesises a wealth of new historical palaeo ecological and biological evidence including estimates of national income reconstructions of past climates and genetic analysis of DNA extracted from the teeth of plague victims to provide a fresh account of the creation collapse and realignment of Western Europe's late medieval commercial economy

Eve's Herbs John M. Riddle, 1997 In *Contraception And Abortion From The Ancient World To The Renaissance* Riddle showed that women in ancient times relied on herbs to regulate fertility In this volume he shows that this ancient knowledge was not lost but survived in coded form

Health and Labor Force Participation over the Life Cycle Dora L. Costa, 2007-11-01 The twentieth century saw significant increases in both life expectancy and retirement rates changes that have had dramatic impacts on nearly every aspect of society and the economy Forecasting future trends in health and retirement rates as we must do now requires investigation of such long term trends and their causes To that end this book draws on new data an extensive longitudinal survey of Union Army veterans born between 1820 and 1850 to examine the factors that affected health and labor force participation in nineteenth century America Contributors consider the impacts of a variety of conditions including social class wealth occupation family and community on the morbidity and mortality of the group The papers investigate and address a number of special topics including the influence of previous exposure to infectious disease migration and community factors such as lead in water mains They also analyze the roles of income health and social class in retirement decisions paying particular attention to the social context of disability Economists and historians who specialize in demography or labor as well as those who study public health will welcome the unique contributions offered by this book which offers a clearer view than ever before of the workings and complexities of life death and labor during the nineteenth century

Averting a Great Divergence Peer Vries, 2019-08-08 The most significant debate in global economic history over the past twenty years has dealt with the Great Divergence the economic gap between different parts of the world Thus far this debate has focused on China India and north western Europe particularly Great Britain This book shifts the focus to ask how Japan became the only non western country that managed at least partially to modernize its economy and start to industrialize in the 19th century Using a range of empirical data Peer Vries analyses the role of the state in Japan's economic growth from the Meiji Restoration to World War II and asks whether Japan's economic

success can be attributed to the rise of state power Asserting that the state's involvement was fundamental in Japan's economic catching up he demonstrates how this was built on legacies from the previous Tokugawa period In this book Vries deepens our understanding of the Great Divergence in global history by re-examining how Japan developed and modernized against the odds *The Escape from Hunger and Premature Death, 1700-2100* Robert William Fogel, 2004-05-17 Nobel laureate Robert Fogel's compelling study first published in 2004 examines health nutrition and technology over the last three centuries and beyond Throughout most of human history chronic malnutrition has been the norm During the past three centuries however a synergy between improvements in productive technology and in human physiology has enabled humans to more than double their average longevity and to increase their average body size by over 50 per cent Larger healthier humans have contributed to the acceleration of economic growth and technological change resulting in reduced economic inequality declining hours of work and a corresponding increase in leisure time Increased longevity has also brought increased demand for health care Professor Fogel argues that health care should be viewed as the growth industry of the twenty first century and systems of financing it should be reformed His book will be essential reading for all those interested in economics demography history and health care policy **London in the Age of Industrialisation** L. D. Schwarz, 1992-10-29 Analyses the effects of the industrial revolution on London's working population *The Cambridge Economic History of Modern Europe: Volume 1, 1700-1870* Stephen Broadberry, Kevin H. O'Rourke, 2010-06-24 Unlike most existing textbooks on the economic history of modern Europe which offer a country by country approach The Cambridge Economic History of Modern Europe rethinks Europe's economic history since 1700 as unified and pan European with the material organised by topic rather than by country This first volume is centred on the transition to modern economic growth which first occurred in Britain before spreading to other parts of western Europe by 1870 Each chapter is written by an international team of authors who cover the three major regions of northern Europe southern Europe and central and eastern Europe The volume covers the major themes of modern economic history including trade urbanization aggregate economic growth the major sectors of agriculture industry and services and the development of living standards including the distribution of income The quantitative approach makes use of modern economic analysis in a way that is easy for students to understand **A/AS Level History for AQA The Sun King: Louis XIV, France and Europe, 1643-1715 Student Book** David Hickman, 2016-07-07 A new series of bespoke full coverage resources developed for the AQA 2015 A/AS Level History Written for the AQA A/AS Level History specifications for first teaching from 2015 this print Student Book covers The Sun King Louis XIV France and Europe 1643-1715 Depth component Completely matched to the new AQA specification this full colour Student Book provides valuable background information to contextualise the period of study Supporting students in developing their critical thinking research and written communication skills it also encourages them to make links between different time periods topics and historical themes Women in the Streets Samuel Kline Cohn, 1996-12-17 Ultimately Cohn

argues women are the protagonists of this book whether the issue is their support of other women or the resolution of conflict in the streets of Florence the control of their own dowries or the salvation of their own souls Calamities and the Economy in Renaissance Italy G. Alfani,2013-03-28 Italy faced a number of catastrophes in the long sixteenth century This economic and demographic history follows the consequences of these catastrophes the action of the Horsemen of the Apocalypse War Famine and Plague all followed by Death **Famine Demography** Tim Dyson,Cormac Ó Gráda,2002 This book deals with the important subject of famine demography It contains case studies of the demography of historical and more recent famines in locations as far apart as Ireland Finland India Burundi Russia Greece Madagascar and Japan The authors address issues such as the role of famines in controlling population growth in the past the nature of interactions between starvation and epidemic diseases during times of famine and the detailed demographic consequences of famines In the latter category issues such as the age and cause specific profiles of excess famine mortality receive particular attention Famine Demography illustrates how the demographic impacts of famines can vary according for example to the nature of the famine causation process and the socio economic and demographic characteristics of the populations which are affected The nature and basis of sex differentials in famine mortality are a recurring theme of the book as are the implications for human fertility and migration This is the only comparative volume of its kind It is wide ranging in time and place but at the same time focuses sharply on a particular subject Consequently its contents provide a unique understanding of famine demography which should be of interest to academics and practitioners involved in limiting the consequences of famines A Rural Society After the Black Death Lawrence Raymond Poos,L. R. Poos,2004-01-29 A Rural Society after the Black Death is a study of rural social structure in the English county of Essex between 1350 and 1500 It seeks to understand how in the population collapse after the Black Death 1348 1349 a particular economic environment affected ordinary people s lives in the areas of migration marriage and employment and also contributed to patterns of religious nonconformity agrarian riots and unrest and even rural housing The period under scrutiny is often seen as a transitional era between medieval and early modern England but in the light of recent advances in English historical demography this study suggests that there was more continuity than change in some critically important aspects of social structure in the region in question Among the most important contributions of the book are its use of an unprecedentedly wide range of original manuscript records estate and manorial records taxation and criminal court records royal tenurial records and the records of church courts wills etc and its application of current quantitative and comparative demographic methods **A Community Transformed** Marjorie Keniston McIntosh,2002-06-06 The sequel to McIntosh s acclaimed work Autonomy and Community The Royal Manor of Havering 1200 1500
