Population, Environment, and Social Organization: Current Issues in Human Ecology Michael Micklin, 1973 The story of the Great Irish Famine through the eyes and memories of the Irish people Tells how they lived why their lives depended on the potato how they dreaded the workhouse and how they feared and defied the landlord who collected the rent and evicted them *Population, Environment, and Social Organization: Current Issues in Human Ecology*, 1982

Population, Environment, and Social Organization: Current Issues in Human Ecology Michael Micklin, 1973 The story of the Great Irish Famine through the eyes and memories of the Irish people Tells how they lived why their lives depended on the potato how they dreaded the workhouse and how they feared and defied the landlord who collected the rent and evicted them

Sociological Human Ecology Michael Micklin, Harvey M Choldin, 2019-09-18 First published in This volume grew out of concerns raised by the contributors and a few others over the current status of human ecology within the field of sociology Stemming from conferences and subsequent discussions by a group of sociologist demographers on recent developments in sociological human ecology which started at the annual meeting of the Population Association of America in 1976 the original essays contained in this book are designed to review and assess the current state of knowledge in the field

Continuities in Sociological Human Ecology Michael Micklin, Dudley L. Poston, 2013-11-11 The completion of this volume would not have been possible without the generous and dedicated help of numerous people The book had its genesis in a conference held at Cornell University in the fall of 1990 that was organized by Dudley Poston Paul Eberts and Michael Hannan all professors at the time at Cornell With the very generous financial assistance of David Call then the dean of Cornell's College of Agriculture and Life Sciences Poston Eberts and Hannan put together a two day conference of lectures and papers by human ecologists from Cornell University and elsewhere The conference focused on sociological human ecology and celebrated the fortieth anniversary of the publication of Amos Hawley's *Human Ecology* Ronald Press 1950 Professor Hawley was the keynote speaker at the conference Many of the authors of the chapters in this volume presented earlier versions at the Cornell conference in 1990 Cornell's Departments of Rural Sociology and Sociology also contributed financial assistance however without Dean Call's very generous support the conference would not have been possible A few months after the conference Poston and Michael Micklin discussed the possibility of asking the various authors of the Cornell conference papers to revise them for publication in a volume on sociological human ecology Many opted to do so but others did not because of time and other kinds of commitments and constraints *Handbook of Population* Dudley L.

Poston, Michael Micklin, 2006-04-26 This comprehensive handbook provides an overview and update of the issues theories processes and applications of the social science of population studies The volume's 30 chapters cover the full range of conceptual empirical disciplinary and applied approaches to the study of demographic phenomena This book is the first effort to assess the entire field since Hauser and Duncan's 1959 classic *The Study of Population* The chapter authors are among the

leading contributors to demographic scholarship over the past four decades They represent a variety of disciplines and theoretical perspectives as well as interests in both basic and applied research

City and Region Wendelin Strubelt, Grzegorz Gorzelak, 2008-02-26 This book deals with the development of cities and regions in times of decisive transformation in Europe throughout these past twenty years In the Western parts of Europe cities and regions were challenged from the outside by globalisation and by technological and demographic change from the inside On top of that the Eastern parts were confronted with deep restructuring processes enforced by the transition from socialist to capitalistic structures By now all European cities and regions are confronted with challenges stemming from a new global competition for jobs population and status Authors from different national backgrounds of Central Europe are analysing and reflecting on these changing structures and processes

The Ecological Transition John W. Bennett, 2017-09-29 Written during the height of the ecology movement The Ecological Transition is a stunning interdisciplinary work It combines anthropology ecology and sociology to formulate an understanding of cultural environmental relationships While anthropologists have been studying relationships between humans and the physical environment for a very long time only in the last thirty years have questions inherent in these relationships broadened beyond description and classification For example the concept of environment has been extended beyond the physical into the social Although anthropologists have adopted many of the concepts that Bennett develops in the book he also feels that the central issues have never been addressed either by anthropologists or by people in related disciplines The most important of these in Bennett s opinion is the failure to incorporate a respect for the environmental in contemporary culture which would allow making exceptions in certain human practices in order to protect the environment His point in The Ecological Transition is that a basic cultural change in modern civilization is necessary to achieve this end Both a theoretical and a practical work The Ecological Transition emphasizes the relationships between human culture the physical environment technology and social policy The Ecological Transition is a challenging volume that makes us face the consequences of human behavior in the modern world its effect on pollution natural resources agriculture the economy and population to name just a few areas The book remains a significant contribution to the discourse on social economic and environmental problems While the book was first published in 1976 it still reads as a contemporary tract
