Population Growth And Agrarian Change:

Population Growth and Agrarian Change David B. Grigg, 1980-12-18 This book first published in 1980 suggests some ways of looking at the interrelationships between population growth and agrarian change and uses these approaches to consider the demographic and agrarian problems of various parts of Europe in the past in the fourteenth century the sixteenth and early seventeenth centuries and in the early nineteenth century Population Growth and Agrarian Change, 1975 **Conditions of Agricultural Growth** Ester Boserup, 2013-11-05 Investigating the process of agrarian change this book analyzes costs and productivity under the main systems of primitive agriculture The conclusion is that technical economic and social changes are unlikely to take place within primitive agriculture unless the rural community concerned is exposed to the pressure of population growth a conclusion that is in sharp contrast to generally accepted ideas The themes in the book are central to the discussion of the problems of population explosion and the world's undernourished peoples

Population growth and agrarian change David Brian Grigg, 1980 *The Conditions of Agricultural Growth* Ester Boserup, 1965 The dynamics and land utilization The interdependence of land use and technical change Labour productivity under long fallow and short fallow systems Carrying capacity of land and productivity of labor under intensive agriculture Population growth and working hours The co existence of cultivation systems Diminishing returns to labour and technical inertia The vicious circle of sparse population and primitive techniques Systems of land use as a determinant of land tenure Investment and tenure in tribal communities Rural investment under landlord tenure Incentives to investment under modern tenure

Population Growth and Agrarian Change D. B. Grigg, 1980-12-18 Since the 1950s much attention has been paid to the effect of rapid population growth on the rural societies of the Third World Yet it is often forgotten that Europe faced similar problems in the past This book first published in 1980 suggests some ways of looking at the interrelationships between population growth and agrarian change and uses these approaches to consider the demographic and agrarian problems of various parts of Europe in the past in the fourteenth century the sixteenth and early seventeenth centuries and in the early nineteenth century These places are then compared with rural societies in the developing world at the present time

perhaps received the wide attention that this importance justifies In this study the author reviews for the student of agricultural history successive attempts to describe and explain agricultural changes that are not specific to a limited area or a particular time In a sense The Dynamics of Agricultural Change is a systematic historical geography of agriculture Some of the models the author explores have been developed within agricultural history some drawn from other disciplines can be applied fruitfully to it What is the relationship between population growth and agricultural development Between environmental changes and those in agriculture What was the effect of the industrial revolution And has there been an agricultural revolution This book suggests to university students of economic history historical geography and agriculture a number of stimulating ways of interpreting and reinterpreting agricultural history **Geography in America at the Dawn of the 21st Century** Gary L. Gaile, Cort J. Willmott, 2004-02-05

Geography in America at the Dawn of the 21st Century surveys American geographers current research in their specialty areas and tracks trends and innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 48 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of Geographers AAG Based on a process of review and revision the chapters in this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers Includes a foreword by the eminent geographer Gilbert White **Agrarian Change and Crisis in Europe, 1200-1500** Harilaos

Kitsikopoulos, 2012-03-15 Agrarian Change and Crisis in Europe 1200 1500 addresses one of the classic subjects on economic history the process of aggregate economic growth and the crisis that engulfed the European continent during the late Middle Ages This was not an ordinary crisis During the period 1200 1500 Europe witnessed endemic episodes of famine and a wave of plague epidemics that amounted to one of its worst health crises rivaled only by the Justinian plague in the sixth century These challenges called into question the production of goods and services and the distribution of wealth opening the possibility of fundamental systemic change This book offers an empirical synthesis on a host of economic demographic and technological developments which characterized the period 1200 1500 It covers virtually the entire continent and places equal emphasis both on providing a solid factual framework and comparing and contrasting various theoretical interpretations The broad geographical and conceptual scope of the book renders it indispensable not only for undergraduate students who take courses relating to the economic and social life of the Middle Ages but also to more advanced scholars who often specialize in only one country or region **Agrarian Change and Economic Development** E.L. Jones, S.J.

Woolf, 2013-11-05 Agrarian Change and Economic Development is a landmark volume that examines the historical experience of the relationship between agrarian change and economic development Because agriculture was until recently man's dominant occupation scholars have traditionally drawn little attention to its immense historical importance The essays in this

book redress this balance and illustrate the significance of the western world's escape from an overwhelmingly agrarian condition. It is therefore an ideal work for encouraging those concerned with current problems to perceive agricultural development as professional historians see it and to question the oversimplified historical analogies commonly employed in development economics. Presenting historical examples of change within particular agricultural systems and discussing their implications for national economic development, both social scientists and planners less concerned with historical revision will have equal reason to welcome these case studies of the long run interaction of agrarian change and economic activity. This classic book was first published in 1969.

Economics David A. Dieterle, 2017-03-27 A comprehensive four volume resource that explains more than 800 topics within the foundations of economics: macroeconomics, microeconomics and global economics, all presented in an easy to read format. This expansive reference set serves to establish basic economic literacy of students and researchers, providing more than 800 objective and factually driven entries on all the major themes and topics in economics. Written by leading scholars and practitioners, the set provides readers with a framework for understanding economics as mentioned and debated in the public forum and media. Each of the volumes includes coverage of important events throughout economic history, biographies of the major economists who have shaped the world of economics and highlights of the legislative acts that have shaped the U.S. economy throughout history. The extensive explanations of major economic concepts combined with selected key historical primary source documents and a glossary will endow readers with a fuller comprehension of our economic world.
