Population In An Interacting World:

Population in an Interacting World William Alonso, 1987 Earth's human population inhabits a complex web shaping population movements and patterns of births and deaths. Nine experts explore the nature of the interplay linking rich and poor countries. The demographic experience of each nation occurs in a larger context of social, political, economic, cultural, religious, military, and biological forces.

Experiencing World History Paul Vauthier Adams, 2000-08 The authors Paul V Adams, Lily Hwa, Erick D Langer, Peter N Stearns, and Merry Wiesner Hanks present a chronological framework of world history in terms of its impact on society in Asia, Africa, Europe, the Americas, and the Pacific.

Routledge Handbook of Asian Demography Zhongwei Zhao, Adrian C. Hayes, 2017-12-14 Home to close to 60 per cent of the world's population, Asia is the largest and by far the most populous continent. It is also extremely diverse physically and culturally. Asian countries and regions have their own distinctive histories, cultural traditions, religious beliefs, and political systems, and they have often pursued different routes to development. Asian populations also present a striking array of demographic characteristics and stages of demographic transition. This handbook is the first to provide a comprehensive study of population change across the whole of Asia. Comprising 28 chapters by more than 40 international experts, this handbook examines demographic transitions on the continent, their considerable variations, their causes and consequences, and their relationships with a wide range of social, economic, political, and cultural processes. Major topics covered include population studies and sources of demographic data, historical demography, family planning and fertility decline, sex preferences, mortality changes, causes of death, HIV/AIDS, population distribution and migration, urbanization, marriage and family, human capital, and labour force, population ageing, demographic dividends, political demography, population and environment, and Asia's demographic future. This handbook provides an authoritative and comprehensive reference for researchers, policymakers, academics, students, and anyone who is interested in population change in Asia and the world.

Megatrends in Global Interaction Bertelsmann Foundation (ed.), 2012-07-16 We inhabit an increasingly interconnected world, yet too often policymakers and advisors view each issue in a vacuum, focusing primarily on short-term impacts. All of us, policymakers, citizens, and local and global communities, must begin to consider how the major trends that shape our world are likely to develop and how they will intersect and influence one another. This volume is designed to explore and discuss correlations between these global trends or megatrends: Global Governance, Demographic Change and Migration, Energy and Natural Resources, Global Security, Biodiversity, and Economic Globalization. The book's primary focus is to provide a qualitative overview of the trends and to analyze their intersections and interdependencies in the 21st century. The authors hope it will help define some of the complex challenges and exciting opportunities to shaping a world of sustainable economies and societies.

Boris Rewald, Christian Ammer, Thorsten Grams, Henrik Hartmann, Guenter Hoch, Katharina Maria Keiblinger, Andrey V. Malyshev, Ina Christin Meier, 2020-04-01 *The Interactive World of Severe Mental Illness* Diana J. Semmelhack, Larry Ende, Arthur Freeman, Clive Hazell, Colleen L. Barron, Garry L. Treft, 2015-07-03 In our society medication is often seen as the treatment for severe mental illness with psychotherapy a secondary treatment However quality social interaction may be as important for the recovery of those with severe mental illness as are treatments This volume makes this point while describing the emotionally moving lives of eight individuals with severe mental illness as they exist in the U S mental health system Offering social and psychological insight into their experiences these stories demonstrate how patients can create meaningful lives in the face of great difficulties Based on in depth interviews with clients with severe mental illness this volume explores which structures of interaction encourage growth for people with severe mental illness and which trigger psychological damage It considers the clients relationships with friends family peers spouses lovers co workers mental health professionals institutions the community and the society as a whole It focuses specifically on how structures of social interaction can promote or harm psychological growth and how interaction dynamics affect the psychological well being of individuals with severe mental illness **Great Divergence and Great Convergence** Leonid Grinin, Andrey Korotayev, 2015-05-09 This new monograph provides a stimulating new take on hotly contested topics in world modernization and the globalizing economy It begins by situating what is called the Great Divergence the social technological revolution that led European nations to outpace the early dominance of Asia in historical context over centuries This is contrasted with an equally powerful Great Convergence the recent economic and technological expansion taking place in Third World nations and characterized by narrowing inequity among nations They are seen here as two phases of an inevitable global process centuries in the making with the potential for both positive and negative results This sophisticated presentation examines Why the developing world is growing more rapidly than the developed world How this development began occurring under the Western world's radar How former colonies of major powers grew to drive the world's economy Why so many Western economists have been slow to recognize the Great Convergence The increasing risk of geopolitical instability Why the world is likely to find itself without an absolute leader after the end of the American hegemony A work of rare scope Great Divergence and Great Convergence gives sociologists global economists demographers and global historians a deeper understanding of the broader movement of social and economic history combined with a long view of history as it is currently being made it also offers some thrilling forecasts for global development in the forthcoming decades Determinants Of Emigration From Mexico, Central America, And The Caribbean Sergio Diaz-briquets, 2019-03-07 The Immigration Reform and Control Act of 1986 IRCA was a manifestation of widespread public concern over the volume of undocumented immigration into the United States The principal innovation of this legislation the provision to impose penalties on employers

who knowingly hire undocumented immigrants was a response to this concern. This effort at restriction was tempered in IRCA by other provisions permitting the legalization of two types of undocumented immigrants: those who had resided in the United States since January 1, 1982 and what were called special agricultural workers (SAWs) persons who had worked in perishable crop agriculture for at least 90 days during specified periods from 1983 to 1986. Approximately 3.1 million persons sought legalization, what is popularly referred to as amnesty, under these two provisions. The breakdown was roughly 1.8 million under the regular program and 1.3 million as SAWs. Mexicans made up 75 percent of the combined legalization requests.

The 21st Century Singularity and Global Futures Andrey V. Korotayev, David J. LePoire, 2020-01-02 This book introduces a Big History perspective to understand the acceleration of social, technological, and economic trends towards a near-term singularity marking a radical turning point in the evolution of our planet. It traces the emergence of accelerating innovation rates through global history and highlights major historical transformations throughout the evolution of life, humans, and civilization. The authors pursue an interdisciplinary approach, also drawing on concepts from physics and evolutionary biology, to offer potential models of the underlying mechanisms driving this acceleration, along with potential clues on how it might progress. The contributions gathered here are divided into five parts, the first of which studies historical mega-trends in relation to a variety of aspects including technology, population, energy, and information. The second part is dedicated to a variety of models that can help understand the potential mechanisms and support extrapolation. In turn, the third part explores various potential future scenarios along with the paths and decisions that are required. The fourth part presents philosophical perspectives on the potential deeper meaning and implications of the trend towards singularity, while the fifth and last part discusses the implications of the Search for Extraterrestrial Intelligence (SETI). Given its scope, the book will appeal to scholars from various disciplines interested in historical trends, technological change, and evolutionary processes.

Globalization and Neoliberalism Thomas Klak, 2000-01-01 How do recent trends toward globalization affect the Caribbean, a region whose suppliers, production markets, and politics have been globalized for centuries? What is the status of neoliberal development policy in the Caribbean, where the rewards for belt tightening and economic opening have been slow in coming? How have Caribbean policymakers and citizens responded to and resisted the pressures to conform to the new rules of the global economy? By examining these questions through the lens of political economy, this volume explores the interaction among development, trade, foreign policy, the environment, tourism, gender relations, and migration. With its global implications, this book will be invaluable for students and scholars from all disciplines who are concerned with the impact of development and globalization.

Facing Up to Global Warming N.F. Gray, 2015-08-18 In this volume, Professor N. F. Gray offers a comprehensive primer on climate change, sustainability, and how the two concepts are related. This book consists of fifteen chapters, each treating a specific aspect of the current global crisis, including scientific background as well as an up-to-date appraisal of the issue at hand. It covers the reasons behind climate change and the effect it will have on the planet and

on the reader directly Gray also presents readers with the means to assess their own environmental impact and details positive individual and community actions to address global warming Climate change global warming and sustainability are phrases that almost everyone has heard whether on the news or around the dinner table The increasing frequency of major events such as droughts severe storms and floods are beginning to make these concepts inescapable and being fully informed is an absolute necessity for students and indeed for us all Nick Gray PhD ScD is a founding member of the Environmental Sciences Unit 1979 at Trinity College Dublin which was the first center for postgraduate research and training in environmental science and technology in Ireland He has written a number of books and over 150 research papers and book chapters and currently serves as the Director of the Trinity Centre for the Environment **Population Today** ,1986
