Population explosion leads to social problems like unemployment poverty low economic development etc The social development which is determined by better health care facilities education and high literacy rate and improvement in the standard of living of people are adversely affected due to high population The benefits of government schemes do not reach the masses A vast share of GDP is required to keep the level of per capita income constant The weaker sections of the population do not get the share of the development For equitable social development the government should aim not only at controlling the unregulated human growth of numerical strength but also at checking the unregulated movement of the population and increasing the concentration of people in the urbanized areas and providing adequate living space and other facilities These goals have to be jointly linked with the formulation and implementation of policies aimed at population regulation and planning for harnessing both natural and human resources Thus only population growth per se may not be perceived as a problem but its relation with the availability of resources may be viewed with great concern This book will help to some extent to be a well informed person on the Indian demographic situation to the readers in general This will be a source of knowledge and a resource book in the discipline of population studies for academicians University teachers and researchers administrators programme personnel executives field functionaries and other general readers who are involved in solving the gigantic and number one national population problem in different capacities in India **Population Policies and Programmes** United Nations. Department for Economic and Social Information and Policy Analysis, 1993 **The Hope of the Country with a Large Population** Xueyuan Tian, 2014-01-24 China has the largest population in the world However according to the United Nations India and China are expected to simultaneously reach a population of approximately 1.38 billion by 2030 with India taking a slight lead China will be all too happy to surrender its position as the country with the largest population Where does this attitude come from For China this situation is symbolic of the solution to the excessive population and a milestone in the Three Stage population development strategy as well as the people's hope In order to realize this hope it firstly depends on the transformation from the previous high birth rate high death rate and low growth rate of population to a high birth rate low death rate and high growth rate and finally to a low birth rate low death rate and low growth rate It also relies on the post demographic transition to a low fertility level since the 1990s and secondly is closely related to the population change in the future Therefore in depth studies on population and the development of population resources environment economy and society should be conducted on the basis of fresh experiences and theories from the international community in order to move forward with the times to promote the solution to the population problem

and realize the dream of rejuvenating the Chinese nation As a result population change is linked to this great rejuvenation as the great rejuvenation requires the population change and in turn the population change facilitates the great rejuvenation
