The World We Want : How and Why the Ideals of the Enlightenment Still Elude Us Robert B. Loudon Professor of Philosophy University of Southern Maine,2007-09-21 The World We Want compares the future world that Enlightenment intellectuals had hoped for with our own world at present In what respects do the two worlds differ and why are they so different To what extent is and isn't our world the world they wanted and to what extent do we today still want their world Unlike previous philosophical critiques and defenses of the Enlightenment the present study focuses extensively on the relevant historical and empirical record first by examining carefully what kind of future Enlightenment intellectuals actually hoped for second by tracking the different legacies of their central ideals over the past two centuries But in addition to documenting the significant gap that still exists between Enlightenment ideals and current realities the author also attempts to show why the ideals of the Enlightenment still elude us What does our own experience tell us about the appropriateness of these ideals Which Enlightenment ideals do not fit with human nature Why is meaningful support for these ideals particularly within the US so weak at present Which of the means that Enlightenment intellectuals advocated for realizing their ideals are inefficacious Which of their ideals have devolved into distorted versions of themselves when attempts have been made to realize them How and why after more than two centuries have we still failed to realize the most significant Enlightenment ideals In short what is dead and what is living in these ideals

The Trouble with Theory Gavin Kitching,2020-07-23

Postmodern theory has engaged the hearts and heads of the brightest students because of its apparent political and social radicalism. Despite this, Professor Gavin Kitching claims that at the heart of postmodernism is very poor, deeply confused and misbegotten philosophy. As a result, even the very best students who fall under its sway produce radically incoherent ideas about language, meaning, truth and reality. This is not another conservative attack on postmodernism. Rather, it is a carefully considered analysis from a dedicated university teacher who is convinced that we have gone terribly astray. He shows that postmodern theory is at best irrelevant to and at worst undermining of persuasive political arguments and reveals the basic philosophical confusion at its heart, which makes this so essential reading for any student writing a thesis in the humanities and the social sciences and for their teachers. It is the strongest and best attack on the ravages of routine postmodernism that I have ever read. I applaud the way he lists the good causes that students warmly espouse and then suggests a simpler way to support them without the self-destructive it's all just language that is implicit in their work. Professor Sir Bernard Crick, Emeritus Professor of Politics, Birkbeck College, University of London. Gavin Kitching rattles the cages. Will the inmates hear this? They should if only for the reason that there is virtue in learning to argue against yourself. This is a serious book. Professor Peter Beilharz, Sociology, La Trobe University. Required reading for anyone who wants to understand how and why postmodernism has had such disastrous pedagogical consequences. Professor David G. Stern, Philosophy, University of Iowa.

Being Human J. Andrew Kirk, 2019-01-25. This book offers an introductory review to a wide range of thinking formulated over the last half millennium in the Western world about the meaning of human existence. It will touch on a variety of issues of contemporary significance such as the origin and uniqueness of the human species, freedom and determinism, the nature of good and evil and the possibilities and limits of the sciences. The book will supply a number of explanatory comments from a Christian perspective on the various views uncovered. Insofar as human beings are fascinated by exploring the reality of their own selves in relation to history, culture, the natural environment and a variety of worldviews, this book will afford readers plenty of material to stimulate them in their own exploration. *What Should Philosophy Do?* Steven Yates, 2021-07-12.

Philosophy as an academic discipline has fallen on hard times. Its practitioners might retort that never have there been so many books, articles, blogs etc. But quantity is not quality and while philosophers are graduating with PhDs, few are finding adequate employment and this is just the most visible problem. The question *What Should Philosophy Do?* is going begging and the social justice warriors have tried to transform it into one of their political platforms right along with the rest of the liberal arts or humanities. In this book, philosopher Steven Yates revisits the question anew and comes up with a fresh perspective. He argues that philosophy is not a mere academic discipline; that it has a job to do in civilization that transcends its academic niche. He argues that philosophy should identify, clarify and evaluate worldviews, noting their contributions, noticed as such or not, to the conversations of civilization, examining their capacity to solve problems, their consistency and their overall adequacy in helping us live. Yates concludes that we should revisit the Christian worldview and perhaps other worldviews as

part of an intellectual move towards a philosophical pluralism that emphasizes the freedom and intrinsic value of persons and could provide an alternative to the technocratic world order towards which we are presently heading at breakneck pace

A World on Fire Joe Jackson,2007-02-27 Like Charles Seife's *Zero* and Dava Sobel's *Longitude* this passionate intellectual history is the story of the intersection of science and the human in this case the rivals who discovered oxygen in the late 1700s That breakthrough changed the world as radically as those of Newton and Darwin but was at first eclipsed by revolution and reaction In chronicling the triumph and ruin of the English freethinker Joseph Priestley and the French nobleman Antoine Lavoisier the former exiled the latter executed on the guillotine *A World on Fire* illustrates the perilous place of science in an age of unreason

Indigenous peoples and human rights Patrick Thornberry,2013-07-19 This study of the rights of indigenous peoples looks at the historical cultural and legal background to the position of indigenous peoples in different cultures including America Africa and Australia It defines indigenous peoples and looks at their position in international law

Philosophy Goes to the Movies Christopher Falzon,2007 *Philosophy Goes to the Movies* is a new kind of introduction to philosophy that makes use of the movies to explore philosophical ideas and positions It guides the reader through philosophy using lively and illuminating cinematic examples

Secularism Mike King,2007-11-29 Spirituality is a difficult subject in the modern world Everywhere from popular media to the university from the bookshelf to the dinner table religions are derided or marginalised and public figures such as Richard Dawkins set upon anyone who admits to a belief in God It seems that science and religion are fundamentally at odds and that a mutual respect is unacceptable to either in their parallel pursuit of truth Yet the majority of Enlightenment authors engaged with both science and spirituality and did not lose their faith Today we tend to see these authors as not having applied full scientific rigour to their religious beliefs but are we correct in dismissing this aspect of their lives so easily In *Secularism* Mike King examines the elements of religion philosophy and science which have contributed to an almost total disavowal of spirituality by contemporary western intellectuals He engages with a wide range of thinkers including Pythagoras Marx Spinoza Darwin and Nietzsche and incorporates detailed studies of a variety of spiritual leaders some of whom readers are unlikely to have considered in this way before to uncover why the western world no longer has any interest in devotion or accords it any respect

The Case for Humanism Lewis Vaughn,Austin Dacey,2003 *The Case for Humanism* is the premier textbook to introduce and help students think critically about the big ideas of Western humanism secularism rationalism materialism science democracy individualism and others all powerful themes that run through Western thought from the ancient Greeks and the Enlightenment to the present day Visit our website for sample chapters

Power and Progress Paul T. McCartney,2006-02-01 In *Power and Progress* Paul T McCartney presents a provocative case study of the Spanish American War exposing newfound dimensions to the relationship between American nationalism and U S foreign policy Two significant but distinct foreign policy issues are at the center of McCartney's analysis the declaration of war against Spain in 1898 and the annexation of the Philippine Islands as

part of the war's peace treaty. According to McCartney, Americans were very explicitly and self-consciously expanding their nation's sense of mission in making these two foreign policy decisions. They drew upon a cultural identity forged from racist, religious, and liberal democratic characteristics to guide the United States into the uncharted waters of international prominence. What America did abroad, they emphatically framed in terms of what they believed America to be. Foreign policy, McCartney argues, provided a concrete focus for this sense of mission on the world stage and played a marked role in shaping the contours and substance of American nationalism itself. *Power and Progress* provides the first intensive look at how the idea of American mission has influenced the conduct of U.S. foreign policy, lending fresh insight into a transformative moment in the development of both U.S. foreign policy and national identity. It contributes measurably to our understanding of the cultural sources of American foreign policy and thus serves as a partial corrective to studies that overemphasize economic motives.

Great Delusion John J. Mearsheimer, 2018-09-25 A renowned scholar argues that liberal hegemony, the policy America has pursued since the Cold War ended, is doomed to fail. Named a *Financial Times* Best Book of 2018, *Idealists* as well as realists need to read this systematic tour de force. Robert D. Kaplan, author of *The Return of Marco Polo's World*, it is widely believed in the West that the United States should spread liberal democracy across the world, foster an open international economy, and build international institutions. The policy of remaking the world in America's image is supposed to protect human rights, promote peace, and make the world safe for democracy. But this is not what has happened. Instead, the United States has become a highly militarized state, fighting wars that undermine peace, harm human rights, and threaten liberal values at home. In this major statement, the renowned international relations scholar John Mearsheimer argues that liberal hegemony, the foreign policy pursued by the United States since the Cold War ended, is doomed to fail. It makes far more sense, he maintains, for Washington to adopt a more restrained foreign policy based on a sound understanding of how nationalism and realism constrain great powers abroad. *The Great Delusion* is a lucid and compelling work of the first importance for scholars, policymakers, and everyone interested in the future of American foreign policy.

A Modern Introduction to Theology Philip Kennedy, 2009-09-22 Philip Kennedy here offers the first book that any student with or without religious convictions can profitably use to get quickly to grips with the essentials of the Christian religion: its history and its key thinkers, its successes and its failures. Most existing undergraduate textbooks of theology begin from essentially traditional positions on the Bible, doctrine, authority, interpretation, and God. What makes Philip Kennedy's book both singularly important and uniquely different is that it has a completely new starting point. The author contends that traditional Christian theology must extensively overhaul many of its theses because of a multitude of modern social, historical, and intellectual revolutions. Offering a grand historical sweep of the genesis of the modern age and writing with panache and a magisterial grasp of the relevant debates, conflicts, and controversies, *A Modern Introduction to Theology* moves a tired and increasingly incoherent discipline in genuinely fresh and exciting directions and will be welcomed by students and readers of
