**Image-Based Evidence in International Criminal Prosecutions** Jonathan W. Hak,2024-02-06 The use of image based evidence in international criminal prosecutions is at a tipping point In his pioneering book on the topic Jonathan W Hak KC provides critical insight into the authentication and interpretation of images setting out how images can be effectively used in the search for the truth While images can convey vital information more efficiently and effectively than words alone the biases of photographers the use of image altering technology and the generation of images with artificial intelligence can lead to mischief and injustice In this context images must be effectively authenticated and interpreted to establish their true meaning Addressing the growing need for visual literacy Jonathan W Hak s *Image Based Evidence in International Criminal Prosecutions* systematically explores the value of images as probative and didactic evidence in international criminal law It analyses existing challenges in the creation acquisition processing and use of image based evidence making recommendations for how those challenges might be addressed In particular the book investigates emerging technical frontiers in image based evidence and the potential uses for advanced visual representations like virtual reality immersive virtual environments and augmented reality Ultimately the book argues that advanced visual representations may have sufficient probative value and proposes cautious parameters for their application in the international courtroom An essential resource for anyone working with image based evidence the book offers significant guidance relevant legal and technical

detail and recommendations for the use of image based evidence in investigations and the courtroom [America's Film Legacy](#) Daniel Eagan,2010-01-01 Collection of the five hundred films that have been selected to date for preservation by the National Film Preservation Board and are thereby listed in the National Film Registry *Painting the Prehistoric Body in Late Nineteenth-Century France* Sharon Parker,2018-11-19 In late nineteenth century France when Charles Darwin's theories of evolution had finally begun to permeate French culture and society several academic artists turned to a relatively new sub genre of history painting the prehistoric themed subject This artistic interest in Darwin's theories was manifested as paintings and sculptures of prehistoric humanity engaged in physical conflict with each other or other animals struggling for food or hunting all nineteenth century popular understandings of survival of the fittest This book examines how this sub genre captured the imagination of French Salon painters from the 1880s to early 1900s in particular that of Fernand Cormon 1845-1924 one of the foremost academic painters during the final quarter of the nineteenth century A central argument of this book concerns the unique interpretation of prehistoric humanity that Cormon visualized in his paintings While the vast majority of prehistoric themed images made by his salon colleagues focused on violence combat and sexual conquest Cormon's paintings depict a conflict free humanity in which collaboration and cooperation dominate rather than physical struggle This study probes the French intellectual understanding and appropriation of Darwin's theories and considers how the French mis translation of *The Origin of Species* by Comte Auguste Royer the first French translator of the text along with Neo Lamarckism and republican ideology in Third Republic France may have collectively shaped Cormon's representation of early humanity The art press overwhelmingly favored Cormon's visualization of the prehistoric world over that of his Salon peers Through extended analysis of the art criticism concerning Cormon's work Sharon Parker argues that critics very clearly preference for Cormon's paintings was rooted in their awareness that he utilized the sub genre of the prehistoric as a forum in which to reimagine and revive academic figurative painting at a time when the critical reception of Salon art had reached its nadir Additionally this study provides a broad overview of the visual models in particular the anthropological and ethnographic texts and imagery most readily available to Cormon as sources for shaping his vision of the prehistoric world

in framing the Cold War as a battle between left and right one in which the Global South is cast as either witting or unwitting proxies of Washington and Moscow What if the era is told from the perspective of the many who preferred reform to revolution Scholars have routinely neglected dismissed or caricatured moderate politicians In this book Allen Wells argues that until the Cuban Revolution the struggle was not between capitalism and communism that was Washington s abiding preoccupation but between democracy and dictatorship Beginning in the 1920s the fight against authoritarianism was contested on multiple fronts political ideological and cultural taking on the dimensions of a political crusade Convinced that despots represented an existential threat reformers declared that no civilian government was safe until the cancer of dictatorship was excised from the hemisphere Dictators retaliated often with deadly results exporting strategies that had been honed at home to guarantee their political survival Grafted onto this war without borders was a belated Cold War with all its political convulsions the aftershocks of which are still felt today
