Hans Maes,2019-11-20 Portraits are everywhere One finds them not only in museums and galleries but also in newspapers  
and magazines in the homes of people and in the boardrooms of companies on stamps and coins on millions of cell phones  
and computers Despite its huge popularity however portraiture hasn t received much philosophical attention While there are  
countless art historical studies of portraiture contemporary philosophy has largely remained silent on the subject This book  
aims to address that lacuna It brings together philosophers and philosophically minded historians with different areas of  
expertise to discuss this enduring and continuously fascinating genre The chapters in this collection are ranged under five  
broad themes Part I examines the general nature of portraiture and what makes it distinctive as a genre Part II looks at some  
of the subgenres of portraiture such as double portraiture and at some special cases such as sport card portraits and  
portraits of people not present How emotions are expressed and evoked by portraits is the central focus of Part III while Part  
IV explores the relation between portraiture fiction and depiction more generally Finally in Part V some of the ethical issues  
surrounding portraiture are addressed The book closes with an epilogue about portraits of philosophers Portraits and  
Philosophy tangles with deep questions about the nature and effects of portraiture in ways that will substantially advance the  
scholarly discussion of the genre It will be of interest to scholars and students working in philosophy of art history of art and
