Post-Production and the Invisible Revolution of Filmmaking George Larkin,2018-12-07 Post Production and the Invisible Revolution of Filmmaking studies the discourses surrounding post production as well as the aesthetic effects of its introduction during the 1920s and 1930s by exploring the philosophies and issues faced by practitioners during this transitional transformative period The introduction of post production during the transition from silent cinema to the synchronized sound era in the 1920s American studio system resulted in what has been a previously unheralded and invisible revolution in filmmaking Thereafter a film no longer arose from a live and variable combination of audio and visual in the theater as occurred during the silent film era where each exhibition was a singular event The new system of post production effectively shifted control of a film s final form from the theater to the editing room With this new process filmmakers could obtain and manipulate an array of audio elements and manufacture a permanent soundtrack This transition made possible a product that could be easily mass produced serving both to transform and homogenize film presentation fundamentally creating a new art form With detailed research and analysis and nearly 50 illustrations this book is the ideal resource for students and researchers of film history and post production **Maximum PC** ,2007-10 Maximum PC is the magazine that every computer fanatic PC gamer or content creator must read Each and every issue is packed with punishing product
