Knowledge and Power William Burns, 2018-07-06 *Knowledge and Power* presents and explores science not as something specifically for scientists but as an integral part of human civilization and traces the development of science through different historical settings from the Middle Ages through to the Cold War Five case studies are examined within this book the creation of modern science by Muslims Christians and Jews in the medieval Mediterranean the global science of the Jesuit order in the early modern world the relationship between modernization and westernization in Russia and Japan from the late seventeenth to the mid nineteenth century the role of science in the European colonization of Africa and the rivalry in big science between the United States and the Soviet Union during the Cold War Each chapter includes original documents to further the reader s understanding and this second edition has been enhanced with a selection of new images and a new chapter on Big Science and the Superpowers during the Cold War Since the Middle Ages people have been working in many civilizations and cultures to advance knowledge of and power over the natural world Through a combination of narrative and primary sources *Knowledge and Power* provides students with an understanding of how different cultures throughout time and across the globe approached science It is ideal for students of world history and the history of science

Taking European Knowledge Society Seriously Ulrike Felt, Brian Wynne, 2007-07-30 This report is the product of an expert working group acting under mandate from the European Commission Directorate General for Research DG RTD including contributions from specialists in science and technology studies policy analysis sociology philosophy and law as well as participants from civil society organizations The report looks at the causes and implications of widely recognised European public unease with science and science based technologies It asks how we might at the same time further EU commitments to enhance democratic civil society in Europe as well as address urgent challenges for science and technology policy for science and governance including those of climate and sustainability Individual chapters deal with innovation policy the regulation of risk institutionalised approaches to ethics and modes of learning in complex environments as well as efforts to engage European publics in the governance of science A final

conceptual chapter draws these themes together by analysing the role of overarching imaginaries in shaping practices and perspectives in all these areas In conclusion the report advances a number of salient messages for policy makers and sixteen specific recommendations for policy improvement In sum the authors call for new forms of experiment in both governance and science moving beyond conventional linear understandings and engaging afresh with the rich diversity of European public life Only in this way the authors argue will European policy take knowledge society seriously and fulfil its abundant promise Editor *Science and Governance* Ulrikke Felt, Brian Wynne, 2007 *Science between Europe and Asia* Feza Günergun, Dhruv Raina, 2013-01-27 This book explores the various historical and cultural aspects of scientific medical and technical exchanges that occurred between central Europe and Asia A number of papers investigate the printing gunpowder guncasting shipbuilding metallurgical and drilling technologies while others deal with mapping techniques the adoption of written calculation and mechanical clocks as well as the use of medical techniques such as pulse taking and electrotherapy While human mobility played a significant role in the exchange of knowledge translating European books into local languages helped the introduction of new knowledge in mathematical physical and natural sciences from central Europe to its periphery and to the Middle East and Asian cultures The book argues that the process of transmission of knowledge whether theoretical or practical was not a simple and one way process from the donor to the receiver as it is often admitted but a multi dimensional and complex cultural process of selection and transformation where ancient scientific and local traditions and elements The book explores the issue from a different geopolitical perspective namely not focusing on a singular recipient and several points of distribution namely the metropolitan centres of science medicine and technology but on regions that are both recipients and distributors and provides new perspectives based on newly investigated material for historical studies on the cross scientific exchanges between different parts of the world
