Revolutions in Eastern Europe Niels C. Nielsen, 1991-01-01 *Revolutions in Eastern Europe* Niels Christian Nielsen (Jr), 1991 **The American Bibliography of Slavic and East European Studies** Patt Leonard, Rebecca Routh, 2020-02-27

Europe and connected to the Middle East through their own political and cultural ties As a result European Jewish writers have had to negotiate the problematic confluence of antisemitic and orientalist discourse Laurel Plapp traces this trend in utopic visions of Jewish Muslim relations that criticized the early Zionist movement in post Holocaust depictions of coalition between Jews and African slaves in the Caribbean revolutions and finally in explorations of diasporic transnational Jewish identity after the founding of Israel Above all Plapp proposes that Jewish studies and postcolonial studies have much in common by identifying ways in which Jewish writers have allied themselves with colonized and exilic peoples throughout the world

Faith-Based Organizations and Social Welfare Miguel Glatzer, Paul Christopher Manuel, 2020-08-18 This volume seeks to understand the role and function of religious based organizations in strengthening associational life through the provision of social services thereby legitimizing a new role for faith in the formerly secular public sphere Specifically we explore how a church in a postcommunist setting during periods of economic growth and recession in the wake of transitions to capitalism and with varied numbers of adherents might contribute to welfare services in a new political regime with freedom of religion Put another way what new pressures would be placed on the secular welfare state if religious organizations Orthodox Catholic Protestant Muslim others simply stopped offering their services By examining public perceptions of the church changing dynamics of religiosity and church state civil society relations the volume places these issues in context

The Common Good and Christian Ethics David Hollenbach, 2002-08 The Common Good and Christian Ethics rethinks the ancient tradition of the common good in a way that addresses contemporary social divisions both urban and global David Hollenbach draws on social analysis moral philosophy and theological ethics to chart new directions in both urban life and global society He argues that the division between the middle class and the poor in major cities and the challenges of globalisation require a new commitment to the common good and that both believers and secular people must move towards new forms of solidarity

The State against Society Grzegorz Ekiert, 1996-09-30 Classical images of state socialism developed in contemporary social sciences were founded on simple presuppositions State socialist regimes were considered to be politically stable due to their pervasive institutional and ideological control over the everyday

lives of their citizens impervious to reform and change and representative of extreme political and economic dependency. Despite their contrasting historical experiences they have been treated as basically identical in their institutional design, social and economic structures and policies. Grzegorz Ekiert challenges this notion in a comparative analysis of the major political crises in post 1945 East Central Europe: Hungary 1956-63, Czechoslovakia 1968-76 and Poland 1980-89. The author maintains that the nature and consequences of these crises can better explain the distinctive experiences of East Central European countries under communist rule than can the formal characteristics of their political and economic systems or their politically dependent status. He explores how political crises reshaped party-state institutions, redefined relations between party and state institutions, altered the relationship between the state and various groups and organizations within society, and modified the political practices of these regimes. He shows how these events transformed cultural categories, produced collective memories, and imposed long-lasting constraints on mass political behavior and the policy choices of ruling elites. These crises shaped the political evolution of the region, produced important cross-national differences among state socialist regimes, and contributed to the distinctive patterns of their collapse.

Religion, Revolution and the Russian Intelligentsia 1900-1912 Christopher Read, 1979-06-17

Uncivil Society Stephen Kotkin, 2010-10-12

Twenty years ago the Berlin Wall fell. In one of modern history's most miraculous occurrences, communism imploded and not with a bang but with a whimper. Now two of the foremost scholars of East European and Soviet affairs, Stephen Kotkin and Jan T. Gross, drawing upon two decades of reflection, revisit this crash. In a crisp, concise, unsentimental narrative, they employ three case studies: East Germany, Romania, and Poland, to illuminate what led Communist regimes to surrender or to be swept away in political bank runs. This is less a story of dissidents, so-called civil society, than of the bankruptcy of a ruling class: communism's establishment or uncivil society. The Communists borrowed from the West like drunken sailors to buy mass consumer goods; then they were unable to pay back the hard currency debts and so borrowed even more. In Eastern Europe, communism came to resemble a Ponzi scheme, one whose implosion carries enduring lessons. From East Germany's pseudotechnocracy to Romania's megalomaniacal dystopia, from Communist Poland's cult of Mary to the Kremlin's surprise restraint, Kotkin and Gross pull back the curtain on the fraud and decadence that cashed the would-be alternative to the market and democracy as an outcome that opened up to a deeper global integration that has proved destabilizing.

The Religious Roots of Contemporary European Identity Lucia Faltin, Melanie J. Wright, 2007-11-01

This volume provides a coherent critical examination of current issues related to the religious roots of contemporary, i.e. post-1990 European identity. This book has taken a multi- and interdisciplinary approach, analysing the religious roots of Europe's identity today with a focus on the secular context of religious communities. This will serve the readers to perceive their own identity in a wider context of shared values reaching beyond a particular faith or non-religious framework.

Revolutions in Sovereignty Daniel Philpott, 2010-07-01 How did the world come to be organized into sovereign states Daniel Philpott argues that two historical revolutions in ideas are responsible First the Protestant Reformation ended medieval Christendom and brought a system of sovereign states in Europe culminating at the Peace of Westphalia in 1648 Second ideas of equality and colonial nationalism brought a sweeping end to colonial empires around 1960 spreading the sovereign states system to the rest of the globe In both cases revolutions in ideas about legitimate political authority profoundly altered the constitution that establishes basic authority in the international system Ideas exercised influence first by shaping popular identities then by exercising social power upon the elites who could bring about new international constitutions Swaths of early modern Europeans for instance arrived at Protestant beliefs then fought against the temporal powers of the Church on behalf of the sovereignty of secular princes who could overthrow the formidable remains of a unified medieval Christendom In the second revolution colonial nationalists domestic opponents of empire and rival superpowers pressured European cabinets to relinquish their colonies in the name of equality and nationalism resulting in a global system of sovereign states Bringing new theoretical and historical depth to the study of international relations Philpott demonstrates that while shifts in military economic and other forms of material power cannot be overlooked only ideas can explain how the world came to be organized into a system of sovereign states

Religion and the Demographic Revolution Callum G.
