Social Science Documentation Centre, 1977 **Science in the Age of Sensibility** Jessica Riskin, 2010-11-15 Empiricism today implies the dispassionate scrutiny of facts But Jessica Riskin finds that in the French Enlightenment empiricism was intimately bound up with sensibility In what she calls a sentimental empiricism natural knowledge was taken to rest on a blend of experience and emotion Riskin argues that sentimental empiricism brought together ideas and institutions practices and politics She shows for instance how the study of blindness led by ideas about the mental and moral role of vision and by cataract surgeries shaped the first school for the blind how Benjamin Franklin s electrical physics ascribing desires to nature engaged French economic reformers and how the question of the role of language in science and social life linked disputes over Antoine Lavoisier s new chemical names to the founding of France s modern system of civic education Recasting the Age of Reason by stressing its conjunction with the Age of Sensibility Riskin offers an entirely new perspective on the development of modern science and the history of the Enlightenment

La Science sociale, 1906 Mega Events, Urban Transformations and Social Citizenship Naomi C. Hanakata, Filippo Bignami, Niccolò Cuppini, 2022-07-26 This book provides theoretical and empirical perspectives on the urban impact of mega events globally It takes mega events as an instance to analyse urban transformations and their effects on citizenship With contributions from leading scholars in the field the book presents innovative and multidimensional analyses of mega events with an international selection of case studies The work provides a grounded theorisation of mega events in the first part and scrutinizes its practices and processes in the second Each chapter explores mega events as crucial drivers and accelerators of urban and citizenship transformations Rather than

just focusing on a staged momentum this book takes stock of the before and after that these events imply for the urban condition This book will be of interest to students and scholars in urban studies human geography economics architecture planning sociology political science It will also appeal to professionals and policy makers engaged in the planning hosting and management of mega events Information Sur Les Sciences Sociales International Social Science Council,2003 **Index**
