Foundation, Architecture, and Prototyping of Humanized AI Mark Chang,2023-07-31 Humanized AI HAI emerging as the next of the AI waves refers to artificial social beings that are very close to humans in various aspects beings who are machine race humans not digital slaves Foundation Architecture and Prototyping of HAI deploy a novel smalldata approach to vertically explore the spectrum of HAI Different from the popular big data philosophy that is based on the rigid notion that the connotation of each concept is fixed and the same to everyone this book treats understanding as a process from simple to complex and uses the similarity principle to effectively deal with novelties Combining the efficiency of the Behaviorists goal driven approach and the flexibility of a Constructivists approach both the architecture of HAI and the philosophical discussions arising from it are elaborated upon Advancing a unique approach to the concept of HAI this book appeals to professors and students of both AI and philosophy as well as industry professionals looking to stay at the forefront of developments within the field **Basics of Probability and Stochastic Processes** Esra Bas,2019-11-05 This textbook

explores probability and stochastic processes at a level that does not require any prior knowledge except basic calculus It presents the fundamental concepts in a step by step manner and offers remarks and warnings for deeper insights The chapters include basic examples which are revisited as the new concepts are introduced To aid learning figures and diagrams are used to help readers grasp the concepts and the solutions to the exercises and problems Further a table format is also used where relevant for better comparison of the ideas and formulae The first part of the book introduces readers to the essentials of probability including combinatorial analysis conditional probability and discrete and continuous random variable The second part then covers fundamental stochastic processes including point counting renewal and regenerative processes the Poisson process Markov chains queuing models and reliability theory Primarily intended for undergraduate engineering students it is also useful for graduate level students wanting to refresh their knowledge of the basics of probability and stochastic processes *Reward* ,1998 Performance Analysis of Communications Networks and Systems Piet Van Mieghem,2009-04-09 This rigourous and self contained book describes mathematical and in particular stochastic methods to assess the performance of networked systems It consists of three parts The first part is a review on probability theory Part two covers the classical theory of stochastic processes Poisson renewal Markov and queuing theory which are considered to be the basic building blocks for performance evaluation studies Part three focuses on the relatively new field of the physics of

networks This part deals with the recently obtained insights that many very different large complex networks such as the Internet World Wide Web proteins utility infrastructures social networks evolve and behave according to more general common scaling laws This understanding is useful when assessing the end to end quality of communications services for example in Internet telephony real time video and interacting games Containing problems and solutions this book is ideal for graduate students taking courses in performance analysis
