The Wires That Bind Saul Griffith, 2023-03-27 A compelling vision of green energy at a local level The country is at a crossroads In *The Wires That Bind* inventor engineer and visionary Saul Griffith reveals the world that awaits us if we make the most of Australia s energy future Griffith paints an inspiring yet practical picture of empowered local communities acting collectively when it comes to renewable energy and benefiting financially He considers both equity and security an end to dependence on foreign oil for

instance He explores the rejuvenation of regional Australia as well as the rise of a new populist movement driven by Australian women And he explodes once and for all the trees v jobs binary This is an electrifying essay about building a better world one community at a time We need a realistic and achievable vision for the future because the future is coming fast We have only about one quarter of one century twenty five years one human generation to get ourselves out of this climate quandary If we get this right if we design the incentives and the policies and the regulations correctly communities will thrive Every Australian will benefit economically socially and even health wise So let s hit the road Saul Griffith *The Wires That Bind* *Age Of Fire Is Over, The: A New Approach To The Energy Transition* Vincent Petit, 2021-07-21 The heart of the contemporary argument on climate change and energy transition focuses on how energy supply should be decarbonized to mitigate greenhouse gas emissions This book proposes an alternative approach The Age of Fire Is Over A New Approach to the Energy Transition finds that energy transitions are not driven by supply side driven transformations but rather by evolutions in demand patterns Exploring the potential of recently emerged key technologies The Age of Fire Is Over argues that the so called Energy Transition has not yet started In the future key technologies will significantly transform demand and provide services at a fraction of today s cost or offer new services not yet imagined To a large extent energy paradigm shifts are driven by such evolutions largely inevitable and often unanticipated because they provide societies with greater benefits lower costs more jobs and rapid adaptation This book closes with key novel recommendations for government institutions to accelerate the energy transition which instead of replicating an approach from the past should focus on these demand transformations to both advance civilization and mitigate climate change With Foreword by Jean Pascal Tricoire Schneider Electric Chief Executive Officer **Electrify** Saul Griffith, 2022-10-04 An optimistic but realistic and feasible action plan for fighting climate change while creating new jobs and a healthier environment electrify everything Climate change is a planetary emergency We have to do something now but what Saul Griffith has a plan In Electrify Griffith lays out a detailed blueprint optimistic but feasible for fighting climate change while creating millions of new jobs and a healthier environment Griffith s plan can be summed up simply electrify everything He explains exactly what it would take to transform our infrastructure update our grid and adapt our households to make this possible Billionaires may contemplate escaping our worn out planet on a private rocket ship to Mars but the rest of us Griffith says will stay and fight for the future Griffith an engineer and inventor calls for grid neutrality ensuring that households businesses and utilities operate as equals we will have to rewrite regulations that were created for a fossil fueled world mobilize industry as we did in World War II and offer low interest climate loans Griffith s plan doesn t rely on big not yet invented innovations but on thousands of little inventions and cost reductions We can still have our cars and our houses but the cars will be electric and solar panels will cover our roofs For a world trying to bounce back from a pandemic and economic crisis there is no other project that would create as many jobs up to twenty five million according to one economic analysis Is this politically possible We can change

Path to Zero Tucker Perkins, 2024-09-24 Tucker Perkins *Path to Zero* shows how we can reverse climate change and create a cleaner environment for future generations by putting aside our biases and working together for change Climate catastrophe inspired narratives like Electrify Everything have a grip on people's minds The simplicity of the solution to the most complex endeavor ever faced by humans the journey to a net zero future is seductive but it is fundamentally flawed In *Path to Zero* 12 Climate Conversations That Changed the World author Tucker Perkins takes readers on a series of future casting journeys from the Year 2050 back to the present day to show us how a better way a wide path to net zero carbon emissions was and can be achieved in an accelerated time frame In this work Perkins uncovers an array of practical often obvious measures the world can take to achieve a better cleaner future inclusive of energy and power Unlike other authors and voices of this age Perkins shows us that change is possible innovation is happening and dogmatic devotion to singular solutions is one of the biggest impediments to progress

The Big Switch Saul Griffith, 2022-02-07 An inspiring practical plan to transform Australia's energy system and supercharge our response to the climate crisis About fcking time we have an actual plan written down that can be executed and financed In a decarbonised world Australia is a winner The opportunity now is ours for the taking Mike Cannon Brookes Climate change is a planetary emergency We have to do something now but what Australian visionary Saul Griffith has a plan In *The Big Switch* Griffith lays out a detailed blueprint optimistic but feasible for fighting climate change while creating millions of new jobs and a healthier environment Griffith explains exactly what it would take to transform our infrastructure update our grid and adapt our households The same natural advantages incredible resources on an enormous continent that helped Australia prosper in the 20th century are the ingredients for becoming the most prosperous entirely renewable economy in the world The point is we don't have to be perfect to solve climate change We just need to be electric If we go hard and go early on cutting emissions and if by so doing we encourage other countries to increase their ambition and follow us we have everything to win We'll be winning so much we'll win win win win win Lower energy prices for all Australians Driving our vehicles will be cheaper than it has ever been Heating our homes and our showers will be cheaper too The average household will probably save 5000 a year or more on energy and car expenses Saul Griffith
