

Rhetoric or Reality? ‘New Governance’ in EU Environmental Policy

Katharina Holzinger, Christoph Knill and Ansgar Schiffer

Abstract: *When scrutinising the literature on EU environmental policy, it becomes apparent that there has been a comprehensive transition in underlying governance ideas during the last two decades. At the core of these changes is the abolition of traditional patterns of interventionist command-and-control regulation in favour of economic instruments and ‘context-oriented’ governance. In view of these developments, this article has two objectives: first, it looks into which causes and factors initiated these discussions; second, it analyses the effects these reform ideas had on actual patterns of governance. As will be shown, changes in governance ideas are only partially expressed in changes in policy instruments.*

I Introduction

When scrutinising the literature on environmental policy in the European Union, it becomes apparent that there has been a comprehensive transition in underlying governance ideas since the beginning of the 1990s. Authors are talking of ‘new instruments’ (Héritier, 2002) or even of the ‘transformation of the environmental governance in the EU’ (Lenschow, 1999). At the core of these changes is the abolition of traditional patterns of interventionist command-and-control regulation in favour of ‘context-oriented’ governance, emphasising close cooperation of public and private actors in the formulation and implementation of EU environmental policy.

The great scientific resonance that this reform development has found ought not, however, blind us to the fact that there was already a broad discussion of environmental governance in the 1980s; this was primarily dealt with in environmental economics and at the level of international organisations (OECD, 1981b). This earlier discussion was less concerned with context-oriented forms of governance, but with introducing economic instruments, which were considered substantially more efficient than interventionist measures.

Against the background of these developments, this article has two objectives: first, it looks into which causes and factors initiated these two mentioned discussions; second, it analyses the effects these reform ideas had on actual patterns of governance in the EU. To what extent and in which direction do new governance ideas actually result in the adoption of new policy instruments?

If one considers the various action programmes in which the strategic orientation of the EU environmental policy is defined for the middle term, a relatively sound finding regarding underlying governance ideas becomes apparent. The political demands for

Environmental Performance in Democracies and Autocracies Romy Escher, Melanie Walter-Rogg, 2020-02-17 There are considerable differences in environmental performance and outcomes across both democracies and autocracies but there is little understanding of how levels of democracy and autocracy influence environmental performance This book examines whether analysing the effects of individual democratic features separately can contribute to a better understanding of cross national variance in environmental performance The authors show that levels of social equality in particular as well as the strength of local and regional democracy contribute significantly to explaining cross national variation in environmental performance On the other hand a high level of political corruption affects a country s ability to adopt and implement environmental policies effectively In exploring the inter relationship between democratic qualities political corruption and environmental performance this book presents policymakers and political theorists with a clear picture of which aspects of democratic societies are most conducive to producing a better environment **Environmental Leadership** Deborah Rigling Gallagher, 2012-09-06 Part of the SAGE Reference Series on Leadership this 2 volume set tackles issues relevant to leadership in the realm of the environment and sustainability Volume 1 of Environmental Leadership A Reference Handbook

Non-Human Nature in World

Politics Joana Castro Pereira, André Saramago, 2020-08-26 This book explores the interconnections between world politics and non human nature to overcome the anthropocentric boundaries that characterize the field of international relations By gathering contributions from various perspectives ranging from post humanism and ecological modernization to new

materialism and post colonialism it conceptualizes the embeddedness of world politics in non human nature and proposes a reorientation of political practice to better address the challenges posed by climate change and the deterioration of the Earth's ecosystems The book is divided into two main parts the first of which addresses new ways of theoretically conceiving the relationship between non human nature and world politics In turn the second presents empirical investigations into specific case studies including studies on state actors and international organizations and bodies Given its scope and the new perspectives it shares this edited volume represents a uniquely valuable contribution to the field **Corporate Social**

Responsibility and Regulatory Governance P. Utting, J. Marques, 2009-11-12 This is the first of two volumes that examine the changing nature of state business relations This book assesses the potential and limits of CSR in developing countries by focusing on aspects that are often ignored in the CSR literature historical experience theoretical perspectives and institutional and political dimensions of change **Socially-critical Environmental Education in Primary Classrooms** Jane Edwards, 2015-10-26 The effectiveness of Education for Sustainable Development depends on the ability of schools and teachers to embrace pedagogies that reduce the gap between the rhetoric of education for the environment and the reality of classroom practices This book responds to the need to better understand the nature of the relationships between agency and structure that contribute to the development of educational rhetoric reality gaps in order to inform processes that most effectively facilitate pedagogical change This book explores the issues of pedagogical change through the experiences of Australian primary school teachers faced with the challenge of implementing an environmental education program in which young students were positioned as active participants in the social processes from which environmentally sustainable practices could be developed These teachers were required to adopt pedagogies that often represented the antithesis of their well established teacher directed approaches Through the use of Anthony Giddens Theory of Structuration this book provides unique perspectives of the teacher mediated manner in which certain elements of structure and agency interrelate to enable and constrain classroom practices essential understandings for school principals and educational policy developers who aim to effectively implement pedagogical change This book also demonstrates that the Theory of Structuration provides a valuable ontological research framework and provides social researchers with practical guidance for how to relate this theory to specific research issues **Bibliographic Index**, 2006 **Routledge Handbook of Environmental Displacement**

and Migration Robert McLeman, François Gemenne, 2018-03-09 The last twenty years have seen a rapid increase in scholarly activity and publications dedicated to environmental migration and displacement and the field has now reached a point in terms of profile complexity and sheer volume of reporting that a general review and assessment of existing knowledge and future research priorities is warranted So far such a product does not exist The Routledge Handbook of Environmental Displacement and Migration provides a state of the science review of research on how environmental variability and change influence current and future global migration patterns and in some instances trigger large scale

population displacements Drawing together contributions from leading researchers in the field this compendium will become a go to guide for established and newly interested scholars for government and policymaking entities and for students and their instructors It explains theoretical conceptual and empirical developments that have been made in recent years describes their origins and connections to broader topics including migration research development studies and international public policy and law and highlights emerging areas where new and or additional research and reflection are warranted The structure and the nature of the book allow the reader to quickly find a concise review relevant to conducting research or developing policy on particular topics and to obtain a broad reliable survey of what is presently known about the subject

Routledge Handbook of Gender and Environment Sherilyn MacGregor, 2017-07-14 The Routledge Handbook of Gender and Environment gathers together state of the art theoretical reflections and empirical research from leading researchers and practitioners working in this transdisciplinary and transnational academic field Over the course of the book these contributors provide critical analyses of the gender dimensions of a wide range of timely and challenging topics from sustainable development and climate change politics to queer ecology and interspecies ethics in the so called Anthropocene Presenting a comprehensive overview of the development of the field from early political critiques of the male domination of women and nature in the 1980s to the sophisticated intersectional and inclusive analyses of the present the volume is divided into four parts Part I Foundations Part II Approaches Part III Politics policy and practice Part IV Futures Comprising chapters written by forty contributors with different perspectives and working in a wide range of research contexts around the world this Handbook will serve as a vital resource for scholars students and practitioners in environmental studies gender studies human geography and the environmental humanities and social sciences more broadly

Healthy Cities Namir Khan, Willem H. Vanderburg, 2001 Modern cities can be designed to constitute a more supportive environment for a great many activities provide a more livable habitat and reduce the burden imposed on the biosphere They can be made healthier in terms of the definition by World Health Organization and more sustainable by means of new and emerging preventive approaches Healthy Cities focuses on those preventive approaches that can make cities healthier and more sustainable This book as well as the two companion volumes Sustainable Energy and Sustainable Production is the result of a twelve year research project carried out at the Center for Technology and Social Development at the University of Toronto The research findings led to the development of a new conceptual framework and strategy aimed at converting technological and economic growth into development that would gradually become more sustainable

A Critical Approach to Climate Change Adaptation Silja Klepp, Libertad Chavez-Rodriguez, 2018-05-20 This edited volume brings together critical research on climate change adaptation discourses policies and practices from a multi disciplinary perspective Drawing on examples from countries including Colombia Mexico Canada Germany Russia Tanzania Indonesia and the Pacific Islands the chapters describe how adaptation measures are interpreted transformed and implemented at grassroots level and how these measures

are changing or interfering with power relations legal pluralism and local ecological knowledge As a whole the book challenges established perspectives of climate change adaptation by taking into account issues of cultural diversity environmental justice and human rights as well as feminist or intersectional approaches Chapter 3 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
