Cox, 2015-03-08 This book is the history of a very remarkable family that of Count Thomas of Savoy whose seven sons and two daughters rose from relative obscurity to fame fortune and involvement in almost every major international conflict in western Europe during the fifty years following their father's death in 1233 By tracing the careers of the Savoyards Eugene L Cox emerges with a pan European view of the thirteenth century Professor Cox describes the ways in which the members of the Savoyard family gained access to the most powerful courts in Europe an advantage that they skillfully employed in turning their scattered Alpine dominions into a territorial state and in making their family a powerful force in the world of high diplomacy From Scotland and Flanders to Sicily and Rome the author traces the influence of the Savoyard family in dealings between states in conflicts with the papacy and in the struggles for power within the emerging national states Based on extensive research in both published and unpublished sources the book pieces together widely scattered data in order to reconstruct a picture of a real life medieval family saga Set as it is in the era of the formation of national states and the breakdown of the Holy Roman Empire the story is a fascinating background account of this tumultuous period in history Originally published in 1974 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **The River Rhone Cycle Route** Mike Wells, 2023-01-31 Guidebook to the River Rhone Cycle Route an 895km bicycle ride from the Alps of central Switzerland to the Mediterranean Sea near Marseille France The route which is mostly downhill except for an optional 15km climb to the start point at Furkapass is divided into 20 stages averaging 45km per stage and can be completed by most cyclists in 12-14 days The route uses two waymarked national cycle trails the Swiss R1 Rhone Route and the French ViaRhona which together have been adopted by the ECF European Cyclists Federation as EuroVelo route EV17 The guide provides detailed route descriptions and 1:150,000 mapping for each stage as well as two route options along either the north or south shore of Lake Geneva It also includes plenty of practical advice such as preparing for the journey transport options there and back what to take accommodation en route and a French/German glossary *The Green Count of Savoy* Eugene L. Cox, 2015-12-08 The fourteenth century is usually portrayed as a period of

retrogression and disaster in European history but for the transalpine state of Savoy it was a period of glory During this time almost the entire region between Lombardy and Burgundy was brought under the control of Savoyard rulers The buffer state created between France and Italy hindered French expansion for many centuries and helped preserve the independence of Italy Drawing upon much unpublished material Professor Cox traces the social and political evolution of the principality He discusses how the Savoyard state was governed financed and defended He also provides a fascinating biography of the Green Count Originally published in 1967 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Black Death, 1346-1353 Ole Jørgen Benedictow, 2004 Unique sensational and shocking this revelatory book provides for the first time a complete Europe wide history of the Black Death The author s painstakingly comprehensive research throws fresh light on the nature of the disease its origin its spread on an almost day to day basis across Europe Asia Minor the Middle East and North Africa its mortality rate and its impact on history These latter two aspects are of central importance here for it is demonstrated that the plague s death rates have consistently been underestimated and that they were in fact much higher making the disease s long term effects on history even more profound OLE J BENEDICTOW is Professor of History at the University of Oslo
