Marcuse, 2023-11-15      **An Introduction to Poetry in English** Eric Doumerc, Wendy Harding, 2007      My Poetics Maureen N. McLane, 2024-04-29 This new collection from the acclaimed poet and critic Maureen McLane works in an innovative register of essayistic writing conversable yet grounded in scholarship close readerly but far seeing McLane's encounters with poems and modellings of poetry illuminate her own poetics and suggest more generally all that poetics can encompass With characteristic brilliance McLane pursues a number of open questions How do poems shape our condition and conditioning as sentient creatures How do they generate modes for thinking How does rhyme help us measure out thought What is the relation of poetry to its surround to the environment and how do specific poems activate that relation What is the difference between a poetry of finding rather than of inspiration And how should we understand poetries invested in the notational and others committed to projects as many contemporary poets are as Wordsworth was in his Prelude As these questions suggest My Poetics does not offer a brief for or against a position

on poetry Instead its artful arrangement of readings and divagations and even occasionally verse show us a way to be with poems and poetics      *Nonsense and Other Senses* Elisabetta Tarantino with the collaboration of Carlo Caruso,2020-07-24 This book deals with a topic that is gaining increasing critical attention the literature of nonsense and absurdity The volume gathers together twenty one essays on various aspects of literary nonsense according to criteria that are deliberately inclusive and eclectic Its purpose is to offer a gallery of nonsense practices in literature across periods and countries in the conviction that important critical insights can be gained from these juxtapositions Most of the cases presented here deal with linguistic nonsense but in a few instances the nonsense operates at the higher level of the interpretation of reality on the part of the subject or of the impossibility thereof The contributors to the volume are established and younger scholars from various countries Chronologically the chapters range widely from Dante to V clav Havel and offer a large span of national literatures Czech English Finnish French German Italian Japanese and literary genres poetry prose and drama inviting the readers to trace their own pathway and draw their own lines of connection One point that emerges with particular force is the notion that what distinguishes literary nonsense is its somehow regulated nature Literary nonsense thus sounds like a deliberate last ditch attempt to snatch order from the jaws of chaos the speech of the Fool as opposed to the tale told by an idiot It is this kind of post Derridean retrieval of choice as the defining element in semantic transactions which is perhaps the most significant insight bequeathed by the study of nonsense to the analysis of poetry and literature in general      How to Read and Why Harold Bloom,2001-10-02 Bloom the best known literary critic of our time shares his extensive knowledge of and profound joy in the works of a constellation of major writers including Shakespeare Cervantes Austen Dickinson Melville Wilde and O Connor in this eloquent invitation to readers to read and read well      Songs in Motion Yonatan Malin,2010-05-26 Qualities of motion and emotion in song come from poetic images melody harmony and voice leading but they also come from rhythm and meter the flow and articulation of words and music in time This book explores rhythm and meter in the nineteenth century German Lied including songs for voice and piano by Fanny Hensel n e Mendelssohn Franz Schubert Robert Schumann Johannes Brahms and Hugo Wolf The Lied as a genre is characterized especially by the fusion of poetry and music Poetic meter itself has expressive qualities and rhythmic variations contribute further to the modes of signification These features often carry over into songs even as they are set in the more strictly determined periodicities of musical meter A new method of declamatory schema analysis is presented to illustrate common possibilities for setting trimeter tetrameter and pentameter lines Degrees of rhythmic regularity and irregularity are also considered There has been a wealth of new work on metric theory and analysis in the past thirty years here this research is reviewed and applied in song analysis Topics include the nature of metric entrainment drawing on music psychology metric dissonance hypermeter and phrase rhythm Whereas narrative accounts of the nineteenth century Lied typically begin with Schubert here forms of expansion and elision in songs by Hensel provide a point of departure Repetition links up directly with motion in songs by

Schubert including his famous Gretchen am Spinnrade The doubling and reverberation of vocal melody creates a form of interiorized resonance in Schumann's songs Brahms and Wolf are typically understood as polar opposites in the later nineteenth century here the differences are clarified along with deeper affinities Songs by both Brahms and Wolf may be understood as musical performances of poetic readings and in this regard they both belong to a late period of cultural history
