*Rhythm* Lexi Eikelboom, 2018-08-17 *Rhythm A Theological Category* argues that as a pervasive dimension of human existence with theological implications rhythm ought to be considered a category of theological significance Philosophers and theologians have drawn on the category of rhythm patterned movements of repetition and variation to describe reality however the ways in which rhythm is used and understood differ based on a variety of metaphysical commitments with varying theological implications Lexi Eikelboom brings those implications into the open through using resources from phenomenology prosody and the social sciences to analyse and evaluate uses of rhythm in metaphysical and theological accounts of reality The analysis relies on a distinction from prosody between a synchronic approach to rhythm which observes the whole at once and considers how various dimensions of a rhythm hold together harmoniously and a diachronic approach which focuses on the ways in which time unfolds as the subject experiences it Based on an engagement with the twentieth century Jesuit theologian Erich Przywara alongside thinkers as diverse as Augustine and the contemporary philosopher Giorgio Agamben Eikelboom proposes an approach to rhythm that serves the concerns of theological conversation It then demonstrates the difference that including rhythm in such theological conversation makes to how we think about questions such as what is creation and what is the nature of the God creature relationship from the perspective of rhythm As a theoretical category capable of expressing metaphysical commitments yet shaped by the cultural rhythms in which those expressing such commitments are embedded rhythm is particularly significant for theology as a phenomenon through which culture and embodied experience influence doctrine *Music and Aesthetic Reality* Nick

Zangwill, 2015-06-05 In this volume Zangwill develops a view of the nature of music and our experience of music that foregrounds the aesthetic properties of music He focuses on metaphysical issues about aesthetic properties of music psychological issues about the nature of musical experience and philosophy of language issues about the metaphorical nature of aesthetic descriptions of music Among the innovations of this book Zangwill addresses the limits of literal description

Process and Aesthetics Ondřej Dadejík,Martin Kaplický,Miloš Ševčík,Vlastimil Zuska,2021-04-01 While Alfred North Whitehead did not dedicate any books or articles to aesthetics specifically aesthetic motifs permeate his entire philosophical opus Despite this aestheticians have devoted little attention to Whitehead most

attempts to reconstruct Whitehead's aesthetics have come from process philosophers and even in that context aesthetics has never occupied a central position. In this book four scholars of aesthetics provide another angle from which Whiteheadian aesthetics might be reconstructed. Paying special attention to the notion of aesthetic experience, the authors analyze abstraction versus concreteness, immediacy vs mediation, and aesthetic contextualism vs aesthetic isolationism. For their interpretation of Whiteheadian aesthetics, the concepts of creativity and rhythm are crucial. Using these concepts, the book interprets the motif of the processes by which experience is harmonized, the sensation of the quality of the whole, and directedness towards novelty. The first chapter introduces Whitehead's philosophical method of descriptive generalization. This method assumes that every philosophical system is based on a particular entry point. We show that for Whitehead this entry point was aesthetics. Chapter Two compares Whitehead and Dewey's philosophies to show that both viewed aesthetic experience in terms of complex rhythms; this helps us better understand the differences and the continuities between everyday experience and art. Chapter Three compares Whitehead's ideas with those of Henri Bergson, showing the way art reveals the form of immediate experience and how the aesthetic experience of art relates to truth. The final chapter details the processes that constitute aesthetic experience in a narrower sense, analyzing aesthetic experience from the perspective of the types of abstractive processes it involves and the complex types of experience it produces.

**The Reality of Illusion** Joseph Anderson, 1996. Applying research findings from studies in visual perception, neurophysiology, cognitive psychology, developmental psychology, and anthropology, Joseph D. Anderson defines the complex interaction of motion pictures with the human mind and organizes the relationship between film and cognitive science. Anderson's primary argument is that motion picture viewers mentally process the projected images and sounds of a movie according to the same perceptual rules used in response to visual and aural stimuli in the world outside the theater. To process everyday events in the world, the human mind is equipped with capacities developed through millions of years of evolution. In this context, Anderson builds a metatheory influenced by the writings of J. J. and Eleanor Gibson and employs it to explore motion picture comprehension as a subset of general human comprehension and perception, focusing his ecological approach to film on the analysis of cinema's true substance, illusion. Anderson investigates how viewers with their mental capacities designed for survival respond to particular aspects of filmic

structure continuity diegesis character development and narrative and examines the ways in which rules of visual and aural processing are recognized and exploited by filmmakers He uses Orson Welles's *Citizen Kane* to disassemble and redefine the contemporary concept of character identification he addresses continuity in a shot by shot analysis of images from *Casablanca* and he uses a wide range of research studies such as Harry F Harlow's work with infant rhesus monkeys to describe how motion pictures become a substitute or surrogate reality for an audience By examining the human capacity for play and the inherent potential for illusion Anderson considers the reasons viewers find movies so enthralling so emotionally powerful and so remarkably real
