*The Great Powers and Global Struggle, 1490-1990* Karen A. Rasler, William R. Thompson, 2021-10-21 In *The Great Powers and Global Struggle* Karen A Rasler and William R Thompson focus on two

themes the rise and fall as well as the relative decline of major world powers over the past five hundred years and the way in which these processes have set the stage for the outbreak of global war Their interdisciplinary approach encompasses political science economics sociology geography and history The most significant wars occur when regional leaders historically in Western Europe challenge global leaders By studying the wars of Napoleon Louis XIV Phillip II and the Italian Indian Ocean wars of the sixteenth century through World Wars I and II to the present the authors challenge the long held idea that prosperity leads to over consumption and underinvestment and thus decline a theory traceable to ancient times that remains the principal explanation for global decline today Arguments about global structural change and its implications abound but rarely is the abstract translated into concrete historical terms with emphases on specific actors and empirical documentation Rasler and Thompson reinterpret the past five hundred years of major power warfare and provide extensive tests of the eighteen generalizations critical to their argument They conclude that those who argue that global war and repositioning are no longer a concern among the major powers lack critical understanding of the behavior that contributes to such conflict

**The State and the City** Ted Robert Gurr, Desmond King, 1987-08-27 Many of the oldest and largest Western cities today are undergoing massive economic decline The State and the City deals with a key issue in the political economy of cities the role of the state Ted Robert Gurr and Desmond S King argue that theoreticians from both the left and the right have underestimated the significance of state action for cities Grounding theory in empirical evidence they argue that policies of the local and national state have a major impact on urban well being Gurr and King s analysis assumes modern states have their own interests institutional momentum and the capacity to act with relative autonomy Their historically based analysis begins with an account of the evolution of the Western state s interest in the viability of cities since the industrial revolution Their argument extends to the local level examining the nature of the local state and its autonomy from national political and economic forces Using cross national evidence Gurr and King examine specific problems of urban policy in the United States and Britain In the United States for example they show how the dramatic increases in federal assistance to cities in the 1930s and the 1960s were made in response to urban crises which simultaneously threatened national interests and offered opportunities for federal expansion of power As a result national and local states now play significant material and regulatory roles that can have as much impact on cities as all private economic activities A comparative analysis of thirteen American cities reflects the range and impact of the state s activities at the urban level Boston they argue has become the archetypical postindustrial public city half of its population and personal income are directly dependent on government spending While Gurr and King are careful to delineate the limits to the extent and effectiveness of state intervention they conclude that these limits are much broader than formerly thought Ultimately their evidence suggests that the continued decline of most of the old industrial cities is the result of public decisions to allow their economic fate to be determined in the private sector

Handbook of War Studies II Manus I. Midlarsky, 2000 Essays

reflecting the most recent theoretically and empirically oriented research on international warfare      *The Future of Global Conflict* Volker Bornschier, Christopher Chase-Dunn, 1999-05-12 This critical analysis of long term trends and recent developments in world systems examines such questions as Will the cycles of boom and bust peace and war of the past 500 years continue Or have either long term trends or recent changes so profoundly altered the structure of world systems that these cycles will end or take on a less destructive form The noted international contributors to this volume examine the question of future dominance of the core global systems and include comprehensive discussions of the economic political and military role of the Pacific Rim Japan and the former Soviet Union      *Economic Cycles, Crises, and the Global Periphery* Leonid Grinin, Andrey Korotayev, Arno Tausch, 2016-10-25 This thought provoking monograph analyzes long medium and short term global cycles of prosperity recession and depression plotting them against centuries of important world events Major research on economic and political cycles is integrated to clarify evolving relationships between the global center and its periphery as well as current worldwide economic upheavals and potential future developments Central to this survey are successive waves of industrial and later technological and cybernetic progress leading to the current era of globalization and the changes of the roles of both Western powers and former minors players however that will lead to the formation of the world order without a hegemon Additionally the authors predict what they term the Great Convergence the lessening of inequities between the global core and the rest of the world including the wealth gap between First and Third World nations Among the topics in this ambitious volume Why politics is often omitted from economic analysis Why economic cycles are crucial to understanding the modern geopolitical landscape How the aging of the developed world will affect world technological and economic future p The evolving technological forecast for Global North and South Where the U S is likely to stand on the future world stage *Economic Cycles Crises and the Global Periphery* will inspire discussion and debate among sociologists global economists demographers global historians and futurologists This expert knowledge is necessary for further research proactive response and preparedness for a new age of sociopolitical change      Long-Wave Rhythms in Economic Development and Political Behavior Brian J. L. Berry, 1991 Is economic development a random walk or do underlying rhythms and cycles make it possible to anticipate long term trends Many social scientists have rejected the notion of long term periodicity in economic trends Now after extensive analysis of economic data distinguished scholar Brian J L Berry has found new evidence for the reliability and the value of long wave theory In *Long Wave Rhythms in Economic Development and Political Behavior* Berry argues that the synchronization of long waves and growth cycles is more than a figment of some overactive imagination Presenting his findings graphically he argues that there is persuasive evidence of the existence of deterministic chaos Applying his analysis of rates of change to the economic phenomena of prices Kondratiev cycles and growth Kuznets cycles he discovers that pairs of 25 year growth cycles are embedded within 55 year long waves As a result Berry concludes two different kinds of growth cycles one inflationary and the other deflationary form a

complementary pattern of alternating crises with stagflation and depression Berry also explores the shifting sand of cyclical phenomena in the stock market voting behavior the incidence of wars the rise and fall of great powers and mass psychologies While avoiding dogmatic conclusions he offers a provocative discussion of the long wave context of social phenomena As he examines the American economy in long wave context Berry optimistically asserts that the bust is not inevitable Technological advances in information transfer enable leaders and organizations to anticipate and alleviate the adverse effects of economic cycles Like it or not he writes our lives appear to be embedded in a higher order of complexity collectively we are a societal organism that displays self regulating fluctuations around a path of growth

**Nations at War** Daniel S. Geller, J. David Singer, 1998-02-13 Nations at War provides an explanation of war in international politics grounded on data based empirical research The book classifies and synthesizes the research findings of over 500 quantitative analyses of war at the analytic level of the state dyad region and international system Because wars follow from political decisions two basic decision making models the rational and the non rational are examined in relation to the explanatory framework of the volume In addition case analyses of two wars the Iran Iraq War 1980 and World War I 1914 are provided as demonstrations of scientifically based explanations of historical events The primary structural factors responsible for the onset and seriousness of war are identified and the explanations are developed according to the scientific model of covering laws The conclusion presents a discussion of the potential for probabilistic conditional predictions of conflict within the context of war and peace studies

The Rhythm of Thought in Gramsci Giuseppe Cospito, 2016-09-07 Many scholars have recently shown great interest in a diachronic re examination of Antonio Gramsci s main theoretical political categories in the Prison Notebooks This method would uncover the origins and development of Gramsci s concepts using the same method that Gramsci himself believed would allow us to grasp the rhythm of thought in Marx The present work embraces this perspective and puts it to work in two ways Its first part analyzes the relation between structure and superstructure and the concepts of hegemony and the regulated society Its second part extends the diachronic analysis to the conceptual pairings which represent alternatives to structure superstructure encompassing questions of political and cultural organisation as well as the relation between Gramsci and the major proponents of historical materialism Marx Engels Lenin English translation of Il ritmo del pensiero per una lettura diacronica
