Planning and Budgeting in Poor Countries Naomi Caiden, Aaron B. Wildavsky, 1980-01-01 This substantial treatment of budgeting in poor countries and discussion of the relationship between planning and budgeting covers over eighty nations and three fourths of the world's population While there are many treatments of planning the approach of this study is radically different The authors argue that the requisites of comprehensive economic planning do not exist in poor countries and that in the effort to create them planners merge into the environment they have set out to change Caiden and Wildavsky provide a unique and thorough examination of planning and budgeting by governments of poor countries throughout the world and recommend reforms that are workable and realistic for these countries They analyze the political economic and social developments that influence budgeting and planning in developing countries

Foreign Direct Investment in Developing Countries Sarbajit Chaudhuri, Ujjaini Mukhopadhyay, 2014-07-08 In

development literature Foreign Direct Investment FDI is traditionally considered to be instrumental for the economic growth of all countries particularly the developing ones It acts as a panacea for breaking out of the vicious circle of low savings low income and facilitates the import of capital goods and advanced technical knowhow This book delves into the complex interaction of FDI with diverse factors While FDI affects the efficiency of domestic producers through technological diffusion and spill over effects it also impinges on the labor market affecting unemployment levels human capital formation wages and wage inequality and poverty furthermore it has important implications for socio economic issues such as child labor agricultural disputes over Special Economic Zones SEZ and environmental pollution The empirical evidence with regard to most of the effects of FDI is highly mixed and reflects the fact that there are a number of mechanisms involved that interact with each other to produce opposing results The book highlights the theoretical underpinnings behind the inherent contradictions and shows that the final outcome depends on a number of country specific factors such as the nature of non traded goods factor endowments technological and institutional factors Thus though not exhaustive the book integrates FDI within most of the existing economic systems in order to define its much debated role in developing economies A theoretical analysis of the different facets of FDI as proposed in the book is thus indispensable especially for the formulation of appropriate policies for foreign capital
