Rich And Poor Nations In The Middle East:

Rich And Poor States In The Middle East Malcolm H. Kerr, El Sayed Yassin, Jeswald Salacuse, Ismail Serageldin, 2019-06-04 While oil wealth has enriched some Middle East Arab nations others that lack oil resources have remained poor and are looking now to their oil rich neighbors for development assistance This collection of studies on the economic social and political relationships between the haves and the have nots in the Middle East focuses on Egypt the largest state in the region and on its prospects for change based on financial assistance from other Arab countries The authors have many disagreements about the future of both rich and poor nations in the Middle East and considerable skepticism about the possibility of transforming Egypt but they do agree that the future must be projected in the framework of a new regional order in which oil wealth labor migration and liberalized national economies are fundamental realities

Levels of Socio-economic Development Theory David Jaffee, 1998-07-30 Advanced undergraduates graduate students and social scientists interested in a wide ranging but concise review of contemporary theories of social and economic development will find this second edition invaluable The coverage spans the disciplines of sociology psychology economics political science political economy geography and management The theories are organized by level of analysis individual organizational societal and international to provide the reader with a larger organizational scheme in which to understand the theoretical explanations and arguments and to emphasize the importance of developing linkages among the different levels Some of the new topics discussed include globalization transnational organizational structures debt the transition from socialism to capitalism and human development

The Changing Middle Eastern City G.H. Blake, R.I. Lawless, 2016-03-22 The Middle East defined here as extending from Morocco to Iran and Turkey to Sudan lies at the crossroads of three continents Africa Asia and Europe With the largest reserves of petroleum in the world its importance is well beyond its physical size and population Rapid urban growth has radically transformed Middle Eastern society in recent decades but the associated problems are incompletely understood This volume first published in 1980 highlights some of the major issues of Middle Eastern urbanisation and provides a comprehensive statement about the current position of research Urban origins and the nature of urban growth are discussed to provide a background to considerations of migration employment housing and retailing The contributors suggest that planning strategies have hitherto proved inadequate with small towns being largely overlooked historic quarters rapidly disappearing and water in short supply Future research into all these problem areas is considered essential but the research must be coordinated and utilised Concentrating on practical problems achievements and challenges for research the contributions in this book specially commissioned from active researchers in the field will prove a valuable guide to recent ideas and developments in the Middle East

Affluence and Poverty in the Middle East M. Riad El-Ghonemy, 2002-09-11 Affluence and Poverty in the Middle East is an introduction to the political economy of the Middle East focusing on its most salient features persistent poverty and extreme inequality El Ghonemy

analyses the factors influencing the region including its unique historical religious and cultural mix as well as its economic foundations and forms of corruption For each factor he employs case studies drawn from throughout the region from Turkey to Sudan and Morocco to Iran In the final section El Ghomeny discusses possible solutions to the challenges facing the region including possible uses of a peace dividend and the role of democracy **Everyday Life in the Muslim Middle East**

Daron Acemoglu,James A. Robinson,2013-09-17 NEW YORK TIMES AND WALL STREET JOURNAL BESTSELLER From two winners of the 2024 Nobel Prize in Economic Sciences who have demonstrated the importance of societal institutions for a country's prosperity A wildly ambitious work that hopscoches through history and around the world to answer the very big question of why some countries get rich and others don't The New York Times FINALIST Financial Times and Goldman Sachs Business Book of the Year Award ONE OF THE BEST BOOKS OF THE YEAR The Washington Post Financial Times The Economist BusinessWeek Bloomberg The Christian Science Monitor The Plain Dealer Why are some nations rich and others poor divided by wealth and poverty health and sickness food and famine Is it culture the weather or geography that determines prosperity or poverty As *Why Nations Fail* shows none of these factors is either definitive or destiny Drawing on fifteen years of original research Daron Acemoglu and James Robinson conclusively show that it is our man-made political and economic institutions that underlie economic success or the lack of it Korea to take just one example is a remarkably homogenous nation yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest The differences between the Koreas is due to the politics that created those two different institutional trajectories Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire the Mayan city states the Soviet Union the United States and Africa to build a new theory of political economy with great relevance for the big questions of today among them Will China's economy continue to grow at such a high speed and ultimately overwhelm the West Are America's best days behind it Are we creating a vicious cycle that enriches and empowers a small minority This book will change the way people think about the wealth and poverty of nations as ambitious as Jared Diamond's *Guns Germs and Steel* BusinessWeek The Changing Dynamics of Energy in the Middle East Khalid Al-Rodhan,Anthony H. Cordesman,2006-10-30 The recent rise in global demand for energy and the resulting spike in energy prices have illustrated just how important Middle Eastern energy exports are This book the first on the subject since the hike in energy prices impacted the global energy market outlines the current facts that shape the ability of Middle Eastern producers to supply energy exports It explores the possible future causes both of major interruptions in supply and of failures to maintain and expand export capacity and though it does not predict a major energy crisis it does describe a range of factors that could produce one The recent rise in global demand for energy and the resulting spike in energy prices have illustrated just how important Middle Eastern energy exports are This book the first on the subject since the hike in energy

prices impacted the global energy market outlines current facts that shape the ability of Middle Eastern producers to supply energy exports It explores the possible future causes both of major interruptions in supply and failures to maintain and expand export capacity and though it does not predict a major energy crisis it does describe factors that could produce one Authors Cordesman and Al Rodhan analyze the plans of each country in the region compare those plans with the forecasting models of international organizations and study each country s prospects for stability They also analyze how importing countries such as the United States Europe China and India are dealing with the changing nature of global dependence upon MENA oil Offering the most comprehensive data on current energy resources production capacities estimates import dependence and national plans and strategies The Changing Dynamics of Energy in the Middle East analyzes current energy modeling and shows how the lack of supply driven models has had a negative impact on the understanding of policy makers and strategic thinkers The book concludes its analysis with possible strategic economic and demographic scenarios for the Middle East projecting the impact of each scenario on future energy developments
