Rick Mather Urban Approaches:

Rick Mather Hugh Pearman,1992 Rick Mather s domestic work is an exploration of high density living his restaurants are pieces of social stagecraft and his university and commercial projects address the issue of urban architecture head on This text traces the development of Mather s career **Rick Mather Architects** Robert Maxwell,Patrick Bellew,Tim

Macfarlane,2006 Rick Mather Architects have been practising in London since the early 1970s Best known for their award winning museum extensions such as the Dulwich Picture Gallery and the National Maritime Museum their portfolio spans a broad spectrum of projects These range from private residences to academic masterplans and urban design including both renovations and new buildings such as the Virginia Museum of Fine Art They are world renowned for their intuitive sense of place and context as well as their pioneering technologies in structural glass and sustainable design Cover **Redbrick** William Whyte,2016-08-11 In the last two centuries Britain has experienced a revolution in higher education with the number of students rising from a few hundred to several million Yet the institutions that drove and still drive this change have been all but ignored by historians Drawing on a decade s research and based on work in dozens of archives many of them used for the very first time this is the first full scale study of the civic universities new institutions in the nineteenth century reflecting the growth of major Victorian cities in Britain such as Liverpool Manchester Birmingham York and Durham for more than 50 years Tracing their story from the 1780s until the 2010s it is an ambitious attempt to write the Redbrick revolution back into history William Whyte argues that these institutions created a distinctive and influential conception of the university something that was embodied in their architecture and expressed in the lives of their students and staff It was this Redbrick model that would shape their successors founded in the twentieth century ensuring that the normal university experience in Britain is a Redbrick one Using a vast range of previously untapped sources Redbrick is not just a new history but a new sort of university history one that seeks to rescue the social and architectural aspects of education from the disregard of previous scholars and thus provide the richest possible account of university life It will be of interest to students and scholars of modern British history to anyone who has ever attended university and to all those who want to understand how our higher education system has developed and how it may evolve in the future **RIBA Journal** ,1993 *Urban Design: Green Dimensions* Peter Shirley,J. C. Moughtin,2006-08-11 In *Green Dimensions* Cliff Moughtin relates sustainable development and green design to the realm of urban design and development Examining regional and local frameworks for design and planning this book shows how sustainable urban design can be implemented on every scale Working from a strong theoretical base the author uses case studies and discusses policy developments in order to challenge the conventional wisdom on sustainable design The book provides a rounded discussion of the application and suitability of current practice and predicts future design needs Updating the reader on topics such as energy efficiency sustainable city forms and the culture of new urbanism this completely revised and restructured second edition also includes brand new chapters on the

Urban Park and Bio diversity **The Architectural Review** ,1993 **Understanding Urban Cycling** Justin Spinney,2020-10-28 Academic interest in cycling has burgeoned in recent years with significant literature relating to the health and environmental benefits of cycling the necessity for cycle specific infrastructure and the embodied experiences of cycling Based upon primary research in a variety of contexts such as London Shanghai and Taipei this book demonstrates that recent developments in urban cycling policy and practice are closely linked to broader processes of capital accumulation It argues that cycling is increasingly caught up in discourses around smart cities that emphasise technological solutions to environmental problems and neoliberal ideas on individual responsibility and bio political conduct which only results in solutions that prioritise those who are already mobile Accordingly the central argument of the book is not that the popularisation of cycling is inherently bad but that the manner in which cycling is being popularised gives cause for social and environmental concern Ultimately the book argues that cycling has now become a vehicle for sustaining pro growth agendas rather than subverting them or shifting to sustainable no growth de growth and less technologically driven visions of modernity This book makes an innovative contribution to the fields of Cycling Studies Mobilities and Transport and will be of interest to students and academics working in Human Geography Transport Studies Urban Studies Urban Planning Public Policy Sociology and Sustainability Urban Design and the British Urban Renaissance John Punter,2009-10 An insightful exploration of the strengths weaknesses and implications of New Labour s urban renaissance agenda experts in urban design and planning critically review the development and application of the strategy in Britain s largest cities **Progressive Architecture** ,1993 **Blueprint** ,1996 **Imagining the Future City** Sarah Bell,James Paskins,2013-11-18 London is one of the world s leading cities It is home to an extraordinary concentration and diversity of people industries politics religions and ideas and plays an important role in our highly globalised and tightly networked modern world What does the future hold for London Investigating any aspect of the city s future reveals a complex picture of interrelations and dependencies The London 2062 Programme from University College London brings a new cross disciplinary and highly collaborative approach to investigating this complexity The programme crosses departmental boundaries within the university and promotes active collaboration between leading academics and those who shape London through policy and practice This book approaches the question of London s future by considering the city in terms of Connections Things Power and Dreams Design ,1993 **People of Today** ,2006 **Learning-Through-Touring** Juliet Sprake,2012-03-26 Learning through Touring uncovers ways in which people interact with the built environment by exploring the spaces around between and within buildings The key idea embodied in the book is that learning through touring is haptic the learner is a physical cognitive and emotional participant in the process It also develops the concept that tours rather than being finished products are designed to evolve through user participation and over time Part One of the book presents a series of analytical investigations into theories and practices of learning and touring that have then been developed to produce a set of

conceptual methods for tour design Projects that have tried and tested these methods are described in Part Two Technologies that have been utilised as portable tools for learning through touring are illustrated both through historical and contemporary practices In all of this there is an underlying belief that what is formally presented to us by authorities is open to self discovery questioning and independent enquiry The book is particularly relevant for those seeking innovative ways to explore and engage with the built environment mobile learning educators learning departments in museums galleries and historic buildings organisations involved in bridging the gap between architecture and public understanding and anyone who enjoys finding out new things about their environment *Forthcoming Books* Rose Arny,2000 **The Royal Horticultural Society** Brent Elliott,2004 This title is an official history of the Royal Horticultural Society from its beginnings to the present day Bibliographic Guide to Art and Architecture New York Public Library. Art and Architecture Division,1995 **AA Files** ,1992 **On South Bank: The Production of Public Space** Alasdair J.H. Jones,2016-05-23 Tensions over the production of urban public space came to the fore in summer 2013 with mass protests in Turkey sparked by a plan to redevelop Taksim Gezi Park Istanbul In London concomitant proposals to refurbish an area of the South Bank historically used by skateboarders were similarly met by staunch opposition Through an in depth ethnographic examination of London s South Bank this book explores multiple dimensions of the production of urban public space Drawing on user accounts of the significance of public space as well as observations of how the South Bank is practised on a daily basis it argues that public space is valued not only for its essential material characteristics but also for the productive potential that these characteristics if properly managed afford on a daily basis At a time when policy makers urban planners and law enforcement authorities simultaneously grapple with pressures to deal with social problems such as street drinking vandalism and skateboarding and accusations that new modes of urban planning and civic management infringe upon civil liberties and dilute the publicity of public space this book offers an insightful account of the daily exigencies of public spaces In so doing it questions the utility of the public private binary for our understanding both of common urban space and of different sets of social practices and points towards the need to be attentive to productive processes in how we understand and experience urban open space as public The Architects' Journal ,2002
