Future of Intelligent and Extelligent Health

Environment R.G. Bushko, 2005-11-28 Human body and the world in which it functions is a changing complex adaptive system We are able to collect data about it but the challenge is to infer local dynamics from that data Intelligent Caring Biomechatronic Creatures and Healthmaticians have a better chance of inferring the dynamics that needs to be understood than human physicians

Systems Thinking and Viable Systems Sergio Barile, 2024-02-26 In the last few decades managerial and business studies have shown an increasing inability to explain and forecast emergent dynamics in society economics and the environment Consolidated managerial approaches and business theories seem to be incapable of communicating and depicting the ongoing evolution and new perspectives are required to support both researchers and practitioners in tracing new paths for development Building upon the constructivist approach this book illustrates the multiple advantages that systems thinking can offer in supporting a holistic understanding of social and economic phenomena The book proposes a representation of the firm as a viable system and represents its functioning and decision making processes through a recursive depiction that can be applied for each of the multiple levels through which socio economic environments are defined As a result of the focus on the differences between decision making and problem solving processes the book enriches current knowledge about systems thinking and provides useful instruments through which both researchers and practitioners can effectively understand the multiple variables able to influence decisions and actions within a firm's configuration The book is aimed at both postgraduate students and researchers interested in the multiple dimensions of systems thinking

The Language of Living Matter Bernd-Olaf Küppers, 2022-06-01 This book by an eminent scientist and philosopher provides strong evidence for the claim that language is a general principle of Nature rooted exclusively in physical and chemical laws The author's radical idea inevitably leads us to view the essence origin and evolution of life in a completely new light It shifts the coordinates of our scientific world view in favor of an overarching concept of language that is able to bridge the gap between matter and mind At the same time it removes a blind spot in the

Darwinian concept of evolution To justify this far reaching idea the book takes a long and deep look at our scientific and philosophical thinking at language as such at science s claim to truth and at its methods unity limits and perspectives These are the cornerstones structuring the book into six thematically self contained chapters rounded off by an epilogue that introduces the new topic of Nature s semantics The range of issues covered is a testimony to how progress in the life sciences is transforming the whole edifice of science from physics to biology and beyond The book is aimed at a broad academic and general readership it requires no mathematical expertise

Science, Technology, and Public Policy: Books, monographs, documents, and articles in journals, 1968 through 1970 Lynton Keith Caldwell, William B. DeVille, Hedvah L. Shuchman, 1968 Thinking Through Systems Thinking Ion Georgiou, 2007 Guided by an original analysis of the fundamental idea of emergent property Thinking Through Systems Thinking uncovers the distinct significance but also incompleteness of the systems approach as a theory of human epistemological engagement
