For the Rock Record Jill S. Schneiderman, Warren D. Allmon, 2009-04-06 Creationism began with the fossil record and there it shall end Before Darwin the geological strata with their accompanying fossils formed the first geological theory of life on earth creationism coupled to flood geology It was Darwin who stood that theory on its head and showed that in fact these same fossils could be used to support his new theory of evolution by natural selection Ever since Darwin geology has unequivocally supported evolution and not creationism and yet today Intelligent Design thrives in popular culture Here at last we have a definitive collection of world class geologists and paleontologists who systematically demonstrate precisely why geology destroys all design arguments and reveals instead a deep and rich history of life on earth A perfect companion to all science courses Michael Shermer publisher of Skeptic magazine and author of Why Darwin Matters An excellent contribution on a vital issue which concerns not only geologists but all who value any science Mark Isaak author of The Counter Creationism Handbook **Atlas of Microbial Mat Features Preserved within the Siliciclastic Rock Record** Juergen Schieber, Pradip K.
