The School Librarian School Library Association,1990 *Awards, Honors, and Prizes* ,2010 **Project Natter** Brett Gooden,2005-12-31 In 1944 in response to the bombing of German cities and factories by the Allies an inventor named Erich Bachem developed Projekt Natter Viper an extraordinary highly secret vertical take off semi expendable single seat rocket fighter armed with a nose mounted honeycomb of 73 mm or 55 mm spin stabilized air to air rockets as well as 30 mm cannon The Natter was intended to offer high speed defense of key targets Once blasted into the air from its vertical launch tower the pilot of the Natter was to climb towards an enemy formation using an internal rocket target an enemy bomber and fire his battery of rockets He would then use the remaining kinetic energy to climb higher than the bombers in order to mount a ramming attack Just before impact the pilot was to trigger a mechanism that would activate an ejection seat and separate the rocket unit which would return to earth by means of an automatically deployed parachute for reuse Relatively little has been published on the Natter and this book will provide a detailed and definitive account of this unusual but fascinating aircraft This will be required reading for all those interested in the history of the Luftwaffe during World War II particularly for those fascinated by the radical and revolutionary projects which German aircraft designers contrived toward the end of the Nazi regime **Bulletin of the Atomic Scientists** ,1970-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world
