Department of the Interior. Library,1967 *Science Be Dammed* Eric Kuhn,John Fleck,2019-11-26 *Science Be Dammed* is
an alarming reminder of the high stakes in the management and perils in the mismanagement of water in the western United
States It seems deceptively simple even when clear evidence was available that the Colorado River could not sustain
ambitious dreaming and planning by decision makers throughout the twentieth century river planners and political
operatives irresponsibly made the least sustainable and most dangerous long term decisions Arguing that the science of the
early twentieth century can shed new light on the mistakes at the heart of the over allocation of the Colorado River authors
Eric Kuhn and John Fleck delve into rarely reported early studies showing that scientists warned as early as the 1920s that
there was not enough water for the farms and cities boosters wanted to build Contrary to a common myth that the authors of
the Colorado River Compact did the best they could with limited information Kuhn and Fleck show that development boosters
selectively chose the information needed to support their dreams ignoring inconvenient science that suggested a more
cautious approach Today water managers are struggling to come to terms with the mistakes of the past Focused on both
science and policy Kuhn and Fleck unravel the tangled web that has constructed the current crisis With key decisions being
made now including negotiations for rules governing how the Colorado River water will be used after 2026 *Science Be*
Dammed offers a clear eyed path forward by looking back Understanding how mistakes were made is crucial to
understanding our contemporary problems *Science Be Dammed* offers important lessons in the age of climate change about
the necessity of seeking out the best science to support the decisions we make **National Approaches to Hydrocarbon**
Development Eduardo G. Pereira,Marianthi Pappa,Damilola S. Olawuyi,2025-01-20 This book analyses the legal obstacles
associated with the advancement of unitization processes and procedures at a national domestic level It uses case studies of
identified jurisdictions with relevant States practice and unitization experience in terms of the domestic legal framework and
practices For experience in unitization the book will focus on the following countries the United States Canada the United
Kingdom Norway Brazil Mexico Ghana and Nigeria Focusing on best practices which have influenced the development of the
unitization concept the book looks at the formulation of different models and operating agreements and their potential
impact on unexplored hydrocarbon resources particularly in cases where unitization is necessary The book will be of interest
to practitioners scholars and students in the field of natural resource law international law and unitization **ABA Journal**
