Rodds Chemistry Of Carbon Compounds Volume 4:

Rodd's Chemistry of Carbon Compounds Ernest Harry Rodd, 1978 **Saturated Heterocyclic Chemistry** M F Ansell, G Pattenden, 2007-10-31 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields, the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 90 years, The Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry which originally took the form of Annual Reports. However, by 1967, the whole spectrum of chemistry could no longer be contained within one volume, and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two, and subsequently three volumes covering Inorganic, Organic, and Physical Chemistry. For more general coverage of the highlights in chemistry, they remain a must. Since that time, the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name, whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume.

The Purines, Supplement 1 John H. Lister,2009-09-17 The Chemistry of Heterocyclic Compounds since its inception has been recognized as a cornerstone of heterocyclic chemistry Each volume attempts to discuss all aspects properties synthesis reactions physiological and industrial significance of a specific ring system To keep the series up to date supplementary volumes covering the recent literature on each individual ring system have been published Many ring systems such as pyridines and oxazoles are treated in distinct books each consisting of separate volumes or parts dealing with different individual topics With all authors are recognized authorities the Chemistry of Heterocyclic Chemistry is considered worldwide as the indispensable resource for organic bioorganic and medicinal chemists

Information Sources in Chemistry R. T. Bottle,J. F. B. Rowland,2011-12-01 The aim of each volume of this series Guides to Information Sources is to reduce the time which needs to be spent on patient searching and to recommend the best starting point and sources most likely to yield the desired information The criteria for selection provide a way into a subject to those new to the field and assists in identifying major new or possibly unexplored sources to those who already have some acquaintance with it The series attempts to achieve evaluation through a careful selection of sources and through the comments provided on those sources
