Roeschlaub Architect Of The Emerging West:

Robert S. Roeschlaub Francine Haber, Kenneth Roller Fuller, David Nevin Wetzel, 1988 The American Architect from the Colonial Era to the Present Cecil D. Elliott, 2002-11-27 The later Colonial era saw a need to replace the buildings hurriedly assembled by earlier colonists but competent builders were difficult to find Capable housewrights were usually well paid and many became respected and prosperous members of their communities but craft apprenticeships and a gentlemanly taste were two of the primary requirements for becoming an architect As the profession developed architects in the Northeast initiated efforts to distinguish between their work and that of housewrights and builders This work is a history of the development of architecture as a profession in the United States It is divided into four chronological sections Section One covers the beginnings in Colonial times before 1800 when there were no identifiable professionals Section Two examines architecture from 1800 to the Civil War a period during which the first architects appeared Section Three considers the profession from the time of the Civil War to World War I and the strengthening of the profession s status Section Four covers architecture since World War I up to the present Each section discusses the training of architects standards of practice general management methods information sources minority participation and other aspects of professional operation with special attention given to the relationship between the profession s development and the social history of the periods **A Colorado History** Carl Ubbelohde, Maxine Benson, Duane A. Smith, 2006 For forty years A Colorado History has provided a comprehensive and accessible panoramic history of the Centennial State From the arrival of the Paleo Indians to contemporary times this enlarged edition leads readers on an extraordinary exploration of a remarkable place **Robert S. Roeschlaub** Francine Haber, Kenneth Roller Fuller, David Nevin Wetzel, 1988 From Meetinghouse to Megachurch Anne C. Loveland, Otis B. Wheeler, 2003 Table of contents *Cheap and Tasteful Dwellings* Jan Jennings, 2005 In 1879 Carpentry and Building magazine launched its first house design competition for a cheap house Forty two competitions eighty six winning designs and a slew of near winners and losers resulted in a body of work that offers an entire history of an architectural culture The competitions represented a vital period of transition in delineating roles and responsibilities of architectural services and building trades The contests helped to define the training education and values of practical architects and to solidify house planning ideals The lives and work of ordinary architects who competed in Carpentry and Building contests offer a reinterpretation of architectural professionalization in this time period Cheap and Tasteful Dwellings thoroughly explores the results of these competitions conducted over a thirty year period from 1879 to 1909 The book outlines the philosophy behind and procedures developed for running the competitions looks at characteristics of the eighty six winners of the competitions examines the nature of architectural practices during the period analyzes the winning competition designs and provides biographical details of competition winners and losers A landmark book in architectural history Cheap and Tasteful Dwellings makes a compelling case for the theory of convenient arrangement its history its role

its principles its relationship to contemporary interior design education and its meaning to American architecture More importantly the book explains the impact of Carpentry and Building s contests in furthering the tenets of convenient arrangement for house design By using extensive material from the magazine Jennings leaves little doubt as to how important this overlooked story is to the history of American architecture as a whole
