

The background of the cover is a romantic illustration of a man and a woman in a garden. The woman, on the left, has long brown hair and is wearing a red dress with a grey patterned bodice. She is looking up at the man. The man, on the right, is shirtless and muscular, wearing dark trousers. He is looking down at the woman. They are standing on a grassy lawn. In the background, there is a body of water with a small white swan, a pagoda-like structure, and trees.

Dancing with the Devil Michael Rubin,2015-03-10 The world has seldom been as dangerous as it is now Rogue regimes governments and groups that eschew diplomatic normality sponsor terrorism and proliferate nuclear weapons threaten the United States around the globe Because sanctions and military action are so costly the American strategy of first resort is dialogue on the theory that it never hurts to talk to enemies Seldom is conventional wisdom so wrong Engagement with rogue regimes is not cost free as Michael Rubin demonstrates by tracing the history of American diplomacy with North Korea Iran Iraq Libya the Taliban s Afghanistan and Pakistan Further challenges to traditional diplomacy have come from terrorist groups such as the PLO in the 1970s and 1980s or Hamas and Hezbollah in the last two decades The argument in favor of negotiation with terrorists is suffused with moral equivalence the idea that one man s terrorist is another man s freedom fighter Rarely does the actual record of talking to terrorists come under serious examination While soldiers spend weeks developing lessons learned after every exercise diplomats generally do not reflect on why their strategy toward rogues has failed or consider whether their basic assumptions have been faulty Rubin s analysis finds that rogue regimes all have one thing in common they pretend to be aggrieved in order to put Western diplomats on the defensive Whether in Pyongyang Tehran or Islamabad rogue leaders understand that the West rewards bluster with incentives and that the U S State Department too often values process more than results
