Verbeke, 2004-09-10 Focuses on the three areas of interest in institutions policy implementation market and supply chain organisation and management of rural resources and rural systems The chapters cover insights on the significance of institutions on transaction costs policy analysis agri environmental policies social capital and bottom up approaches

Institutions and Sustainability Volker Beckmann, Martina Padmanabhan, 2009-02-07 From the first vague idea to use Konrad Hagedorn's 60th birthday as an inspiration for taking stock of his vibrant academic contributions this joint book project has been a great pleasure for us in many ways Pursuing Hagedorn's intellectual development we have tried to reflect on the core questions of humanity according to Ernst Bloch Who are we Where do we come from and Where are we heading In this way and without knowing it Konrad Hagedorn initiated a collective action process he would have very much enjoyed if he had been allowed to take part in it But it was our aim and constant motivation to surprise him with this collection of essays in his honour Konrad Hagedorn was reared as the youngest child of a peasant family on a small farm in the remote moorland of East Frisia Germany During his childhood in the poverty ridden years after the Second World War he faced a life where humans were heavily dependent on using nature around them for their livelihoods meanwhile he learned about the fragility of the environment As a boy he tended a one room schoolhouse where his great intellectual talents were first recognised and used for co teaching his schoolmates These early teaching experiences might have laid the foundations for his later becoming a dedicated lecturer and mentor

Political Power and Economic Policy Gordon C. Rausser, Johan Swinnen, Pinhas Zusman, 2011-09-30 This book analyzes the links between political economics governance structures and the distribution of political power in economic policy making The book theoretically explains and empirically quantifies these interactions The analysis includes both public good policies and redistributive policies Part I of the book presents the conceptual foundations of political economic bargaining and interest group analysis After presenting the underlying theory Part II of the book examines ideology prescription and political power coefficients Part III analyzes a number of specific structures and Part IV presents a framework for political econometrics with a number of empirical applications and testable hypotheses In all four parts of the book four analytical dimensions of public policy are distinguished governance structures political economy mechanism design and incidence

Waste and Environmental Policy Massimiliano Mazzanti, Anna Montini, 2011 This research deals with the increasingly complex issues of waste generation waste management and waste disposal that in less developed industrialised countries present diverse but critical concerns It takes a socio economic and policy oriented perspective and provides empirical evidence at EU and regional level The EU and Italy are taken as relevant case studies given the disparities in environmental performances between less and more developed areas The rich and various empirical evidence shows that a robust delinking between waste generation and economic growth is still not present

thus future policies should directly address the problem at the source by targeting waste generation in EU countries. Some structural factors like population density and urbanisation present themselves as relevant drivers of both waste management and landfill diversion. Nevertheless, economic and structural factors alone are not sufficient to improve waste performances. Though waste policies are to be redesigned by covering the entire area of waste management, some first signals of policy effectiveness are arising. This work will be of most interest to those students of environmental economics and environmental sciences as well as policy makers, waste utility managers and companies in the waste management sector.

Journal of Economic Literature, 2006 Trust and Supply Chains Michał Pietrzak, Joanna Domagała, Aleksandra Chlebicka, 2024-12-23. This research volume aims at outlining the substantial role of information asymmetry in agri food chains and how building trust and mitigating this problem could enhance the performance of these chains. The supply chain covers a systemic sequence of linked companies with material and information exchange. Sharing information about capabilities, inventories and needs is vital to streamline channels, reduce uncertainty and enhance performance, but economic agents may be reluctant due to opportunism. Information asymmetry can cause problems in quality assurance and distort the supply chain's functioning. Building trust is crucial and solutions include guarantees, standards, licensing and hybrid governance. Trust and Supply Chains: Information Asymmetry in the Agri Food Sector is based on real world examples and case studies from the agri food industry: cheese, apples, pasta and bakery, beef, organic products and more, providing practical solutions to building trust and sharing information. It offers academics, practitioners and advanced students a comprehensive overview of the various aspects of information asymmetry and trust in agri food supply chains.

Handbook on Climate Change and Agriculture Ariel Dinar, Robert O. Mendelsohn, 2011-01-01. This book is a very useful resource for the lawyer. It makes a good start by presenting a wide ranging portfolio of multidisciplinary research that will assist in progressing the task, challenging though it may be. Chris Rodgers, Environmental Liability. This book explores the interaction between climate change and the agriculture sector. Agriculture is essential to the livelihood of people and nations, especially in the developing world; therefore any impact on it will have significant economic, social and political ramifications. Scholars from around the world and from various fields have been brought together to explore this important topic. The contributions found here analyze direct agronomic effects, the economic impacts on agriculture, agricultural impacts on the economy, agricultural mitigation and farmer adaptation. The authors argue that climate change is likely to have an extensive impact on agriculture around the world through changes in temperature, precipitation, concentrations of carbon dioxide and available water flows. This thorough and timely volume is an invaluable resource for anyone interested in exploring the impacts of climate change in arguably the most important sector of the world economy. Economists, agronomists and climate modelers in academia and the public sector, policy analysts and development agency staff and graduate/postgraduate students will find this remarkable volume a welcome addition to their collection.
