Role Of Mhc And Nonmhc Antigens In Allograft Immunity:

The Role of MHC and Non-MHC Antigens in Allograft Immunity T. Mohanakumar, 1994-01-01 Minor histocompatibility antigens MHA are a group of cell surface membrane proteins that are able to exclusively mediate a cellular immune response These antigens Ag were initially distinguished from major histocompatibility antigens MHC by their weak immunogenicity in allograft transplants As information describing their structure and function accumulated the term MHA was misleading because these immunogens were neither weak nor minor It became clear that non MHC histocompatible antigens non MHC HA was a more appropriate name Non MHC HA are involved not only in transplantation but also in defining immunologic self and shaping the T cell repertoire This book investigates the biology of the non MHC HA and their role in clinical medicine *Transplant International Official Journal of the European Society for Organ Transplantation* G. Opelz, W.A. Buurman, J.P. van Hooff, P. MacMaster, J. Wallwork, 2013-11-11 This supplement to Transplant International contains the Proceedings of the successful 5th Congress of the European Society for Organ Transplantation held in Maastricht from 7-10 October 1991 Of 827 abstracts submitted to the congress 548 were selected by the Scientific Committee for either oral or poster presentation Of these 548 presentations the guest editors selected 212 full papers for publication in this book Two aspects are important where proceedings are concerned the quality of the papers and the speed of publication I thank our authors and guest editors whose combined expertise has given us a guarantee of quality I also thank our editorial and production teams for their tremendous efforts to hasten editing proofreading printing and publication In particular I would like to express my gratitude to Maurits Booster M D and Sylvia van Roosmalen for their assistance and support in seeing this supplement through to completion As a concession to time we have waived some of our stringent rules of style and limited our correspondence with authors by for example page proofs being reviewed and corrected in house only This enables us to publish two months earlier but has the disadvantage that given the allotted time we have not been able to ensure that each and every article has an abstract nor that every article has been dotted in the reference lists or in the addresses/institute affiliations of all the authors **Beyond Histocompatibility - Understanding the Non-MHC Determinants**
