nature of this enterprise involving a number of Spanish American diplomats as sponsors and Spanish exiles as writers and translators shaped the characteristics of its publications and how the notion of useful knowledge conveyed by them was deployed in the service of both commercial and educational concerns The hitherto unexplored mechanisms of book import distribution wholesale and retailing in Spanish America in the 1820s are also analysed as is the way in which the significance of the knowledge transmitted by those books shifted in the course of their production and distribution The author examines how the question and answer form of Ackermann s textbooks constrained both publishers and writers and oriented their readers relation with the texts She then looks at the various ways in which foreign knowledge was appropriated in the construction of individual social national and continental identities this is done through the study of a number of individual reading experiences and through the analysis of the editions and adaptations of Ackermann s textbooks during the nineteenth century

source for the theoretical development of this science Moreover observations have often changed many theoretical concepts Astrometry has not been left behind and the future almost magical observations include the space projects such as GAIA and SIM These projects should be seen as the spur for the adaptation of Astrometry to the new era making this area a basic one in the professional training of any astronomer The astrometrists are the ones who must enlarge their scope to encompass data interpretation taking advantage of the meticulous and craftsman like character that this work has always had in order to access the big data bases that will be generated and are in danger of being considered as sources of statistical information This concern for the future of Astrometry was discussed in this meeting ADeLA 2004 had two additional innovations The first one consisted in including a workshop or a series of conferences on topics related to Astrometry addressed to students interested in astronomy This meeting has offered the opportunity to gather important foreign researchers The participation of ESO Vitacura Chile researchers in ADeLA 2004 as well as the usual ADeLA meeting participants facilitated a wide and diverse series of lectures on related topics These lectures were addressed both in a pedagogical and a professional atmosphere which encouraged Venezuelan undergraduate and graduate students interested in or majoring in astronomy to participate in both events The so called Taller de ADeLA 2004 took place after the meeting on November 25 and 26 The workshop improved the relationships between the Venezuelan scientific and student communities
