Maximal God Yujin Nagasawa,2017 Yujin Nagasawa presents a new stronger version of perfect being theism the conception of God as the greatest possible being Although perfect being theism is the most common form of monotheism in the Judeo Christian Islamic tradition its truth has been disputed by philosophers and theologians for centuries Nagasawa proposes a new game changing defence of perfect being theism by developing what he calls the maximal concept of God Perfect being theists typically maintain that God is an omniscient omnipotent and omnibenevolent being according to Nagasawa God should be understood rather as a being that has the maximal consistent set of knowledge power and benevolence Nagasawa argues that once we accept the maximal concept we can establish perfect being theism on two grounds First we can refute nearly all existing arguments against perfect being theism simultaneously Second we can construct a novel strengthened version of the modal ontological argument for perfect being theism Nagasawa concludes that the maximal concept grants us a unified defence of perfect being theism that is highly effective and economical **This Is Philosophy** Steven D. Hales,2021-03-05 THIS IS PHILOSOPHY The second edition of This is Philosophy improves upon an excellent first edition This clear succinct book is quite possibly the best introduction to Western philosophy on the market Gregory Morgan Stevens Institute of Technology This is a terrific book The writing is not only extremely clear it is downright gripping with relevant and detailed examples at every turn Steven Hales has produced not just a great little introduction to philosophy he has produced a great little book in philosophy period Michael Lynch University of Connecticut Hales clearly explains important philosophical ideas with a minimum of jargon and without sacrificing depth of content and he consistently gives a fair and accurate presentation of both sides of central philosophical disputes Matthew Van Cleave Teaching

Philosophy As the oldest discipline in the academy philosophy began by asking questions of the world and of human nature Philosophers are responsible for the Enlightenment and laid the foundations for constitutional governments Yet while it may have given birth to the natural sciences philosophy has earned a contemporary reputation as an esoteric and impractical field out of touch with everyday life but it doesn't have to be that way This is Philosophy An Introduction expertly guides students through the fundamentals of philosophy by illuminating difficult abstract ideas with straightforward language Assuming no prior background in the subject this volume brings philosophical concepts into sharp focus through relatable examples and clear explanations of philosophy's big questions and arguments The second edition of this accessible textbook is organized around seven central philosophical problems including ethics the existence of God free will personal identity philosophy of mind and epistemology New to this edition is a chapter on political philosophy that explores the state of nature anarchy contractarianism libertarianism and the liberal state These self-contained chapters have been reordered and recalibrated to best suit the needs of introductory philosophy courses and can be taught independently or in sequence Enhanced by updated examples new hyperlinks and references and detailed bibliographies the book is complemented by extensively revised online resources available to instructors including a 200 question test bank and over 450 PowerPoint slides designed to strengthen student comprehension of key concepts Strengthening the popular first edition which launched the series This is Philosophy An Introduction Second Edition is the perfect primary textbook for beginning philosophy students as well as general readers with an interest in philosophy

The Immateriality of the Human Mind, the Semantics of Analogy, and the Conceivability of God (Volume 1) Gyula Klima, 2011-09-22 The Immateriality of the Human Mind the Semantics of Analogy and the Conceivability of God brings together the work of experts in the field of medieval philosophy to consider the nature of God and the soul what can be known of the divine essence and the semantics of theological discourse from the perspectives of medieval theology both natural and revealed logic and natural philosophy In his capacity as an arts master commenting on a work of natural philosophy Aristotle's *De Anima* John Buridan discusses the immateriality of the intellect against the background of the competing mutually exclusive views of Alexander of Aphrodisias and Averroes Aquinas takes up the same issue but in a more properly theological setting in his *Commentary on the Sentences of Peter Lombard* where Aquinas argues that the being of the intellect is independent of matter Thomas de Vio Cajetan considers the semantics of theological discourse or God talk in order to derive a proper means to speak of the divine essence in his *De Nominum Analogia* and Anselm of Canterbury's *Proslogion* seeks with unaided reason to develop a single proof whereby those who think seriously of anything as that than which nothing greater can be thought may know that God exists
