

LOST LINES: NORTH EASTERN REGION

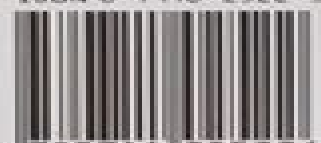

Since the Nationalisation of Britain's railways in 1948 the nation's railway network has almost halved, with the closure of duplicate and unremunerative lines. Although Dr Beeching is widely regarded as the perpetrator of the policy that led to many of these closures — in so far as he was Chairman at the time of the infamous Reshaping Report in the early 1960s — it was a process that had started well before his rise to power. The result of these closures is that Britain has a remarkable heritage of closed railways and stations, some well known and others less familiar, but all of which have a fascinating history.

In the 'Lost Lines' series Nigel Welbourn, who over more than 30 years has visited and revisited most railway lines in the British Isles, provides an illustrated history to many of these lines. Dividing the country into the BR regions, each volume is illustrated with a superb range of some 250 mono illustrations — photographs, maps, ephemera and tickets.

This volume, covering the North Eastern Region, examines many of the most fascinating lines in the area, including closed sections of the historic Stockton & Darlington Railway, the Derwent Valley Light Railway, the Border Counties Railway and the line from Whitby to Scarborough, and many other lines, all of which have a remarkable story to tell.

End of Antiquity James Howard-Johnston,2024-10-28 The last longest and most damaging of the wars fought between East Rome and Sasanian Persia 603-628 brought the classical phase of west Eurasian history to a dramatic close. Despite its evident significance not least as the distant setting for Muhammad's prophetic mission, this last great war of antiquity attracted comparatively little scholarly attention until the last decades of the twentieth century. James Howard-Johnston's contributions to the subject, most of which were published in *Out of the Way Places*, one that on al-Tabari is printed for the first time, are brought together in convenient form in this volume. They strive to root history in close observation of landscape and monuments as well as careful analysis of texts. They explore the evolving balance of power between the two empires, look at events through Roman, Armenian and Arab eyes, and home in on the climax of the final conflict in the 620s. **Lost Railways of the World** Nigel Welbourn,2023-02-16 Many readers will be familiar with Nigel Welbourn's long running series of books covering lost railways in Britain and Ireland. This new book *Lost Railways of the World* is the latest by this author on the subject of disused railways. The material for this volume has been collected and researched over a period of almost fifty years of world travel by the author. Informative text records the fortunes of the world's lost railways and every country with significant disused railways is included. Lost railways are a unifying theme being found throughout the world from the hottest African desert to the coldest steppes of Russia. The book has a surprisingly British flavor as historically many railways throughout the world used British equipment and operating practices. On his first trip in the 1970s the author discovered British signaling equipment in Europe. In 2020 he discovered the same firm's equipment in South America. The world's top ten lost lines are listed from the seven mile long sea bridge on a line that ran through the Florida Keys to the rugged mountain splendor of the Khyber Pass Railway. Some of the oldest, largest, longest, most northerly, southerly, expensive, crookedest, steepest, highest, lowest, and most notorious lost railways are included. Quirky and other unique tales from lost railways are included such as the disappearing phantom bridge, a line destroyed by molten lava, to one that sank under the sea, another that conveyed giant turtles to a memorial to a brave railway elephant. The author also visited remote areas of Argentina and provides more information on the mysterious disappearance of the ex-Lynton Barnstaple Railway locomotive *Lew A*. A large number of the 300 color illustrations have not been published before. Maps and stories from around the world will delight not only the railway enthusiast but appeal to a wider cadre of readers with an interest in nostalgia, history, geography, and travel. To some, the book will be an informative source of information; to others, it is written in a way that highlights the most amazing lost railways in the world. But either way, it is a fascinating and unique book. **Restoration of Lost and Obliterated Corners** United States.
