digital) Pablo Rubio Torres, Pablorigio, 2018-03-15 Las quemaduras han sido una herramienta consuetudinaria de manejo de los montes. Estuvieron dentro del elenco de la silvicultura ilustrada para el manejo de los montes desarbolados y de los restos de cortas en los bosques en Europa hasta el dominio de la mecanización. A su vez los estadounidenses desarrollaron el conocimiento para la ejecución de quemaduras prescritas en los bosques para alcanzar determinadas metas silvícolas en la segunda mitad del siglo XX después del replanteamiento de la estrategia de exclusión total del fuego en sus extensos territorios. Por otra parte el efecto del fuego sobre la naturaleza se consideró negativo desde muchos enfoques en el pasado medio siglo y aún se considera así en la visión urbana popular. Los estudios de todo tipo realizados en las últimas décadas como los avances en la comprensión de las dinámicas ecológicas han profundizado en el conocimiento de los efectos reales del fuego entendiendo que este agente natural tiene una influencia polidámica sobre los montes. El presente libro pretende ser una guía introductoria dirigida a quienes quieran iniciarse en la tecnología de las quemaduras y para entender las bases de la influencia del fuego y de los incendios sobre los montes.

San Benito y el Management Antonio Picarín Pascual, Antonio Pascual, 2012-05-25 A lo largo de este trabajo se analizan en profundidad algunos de los aspectos relativos a los valores personales más relevantes que incluye San Benito en su obra magna La Santa Regla que deben tener en consideración todos y cada uno de los monjes que deseen verse acogidos entre los muros de sus conventos. Si bien esto lo hacía el santo benedictino bien avanzado el año quinientos de nuestra era la correlación que sus principios tienen con nuestra época es lo que ha llevado a este autor a establecer una comparación de aquellas normas aplicadas en nuestros días al management empresarial moderno. Busca las razones por las cuales está fracasando el modelo actual de management, el liderazgo y la propia autoridad. Ofrece posibles alternativas a las formas actuales poniendo especial énfasis en los valores que deben prevalecer entre las personas que componen los equipos de trabajo y la importancia de priorizar los intereses de la organización por encima de cualquier otro personal de la misma manera que prima el respeto al entorno social y ecológico sobre cualquiera de índole empresarial. Es un compendio de valores a seguir y detectar en las personas que van a formar parte de nuestro equipo de trabajo y sobre todo entre los directivos y ejecutivos de cualquier tipo de corporación, empresa u organización que se precie de querer estar a la vanguardia de su tiempo. Los paradigmas han cambiado, la sociedad civil está presta a liderar el cambio. Las empresas, las organizaciones en general no pueden quedarse atrás.

Applied forest management for tropical and subtropical plantations William Ladrach, 2013-01-01 Global demand for forest products is increasing daily. This implies an incremental pressure on tropical and subtropical forests to supply wood products. Natural forests continue to supply wood although their capacity is decreasing steadily. We are depending more and more on forest plantations to satisfy industrial needs for solid wood as well as pulpwood. Fortunately the warm climates have an enormous potential to produce wood fiber when the production is based on applied science. By selecting the appropriate species for given sites and the use of the principles of silviculture and genetic improvement tree plantations can often produce more than 50 m³ ha year. Because of their capacity

for rapid growth the tropical and subtropical regions have a great advantage over the temperate regions William Ladrach has dedicated more than 40 years to the research and management of forest plantations in various parts of the world principally in Central and South America This book Applied Forest Management for Tropical and Subtropical Plantations provides a guide to future forest production It is a guide to applied forestry and covers subjects from viewpoints of the biological ecological economic and industrial sciences This work is of great value to foresters students industrial managers researchers and others who work in equatorial countries It will have a strong and positive impact on the establishment of tree plantations during the coming decades
