The Mansion of Happiness Jill Lepore, 2013-03-26 Renowned Harvard scholar and New Yorker staff writer Jill Lepore has written a strikingly original ingeniously conceived and beautifully crafted history of American ideas about life and death from before the cradle to beyond the grave How does life begin What does it mean What happens when we die All anyone can do is ask Lepore writes That s why any history of ideas about life and death has to be like this book a history of curiosity Lepore starts that history with the story of a seventeenth century Englishman who had the idea that all life begins with an egg and ends it with an American who in the 1970s began freezing the dead In between life got longer the stages of life multiplied and matters of life and death moved from the library to the laboratory from the humanities to the sciences Lately debates about life and death have determined the course of American politics Each of these debates has a history Investigating the surprising origins of the stuff of everyday life from board games to breast pumps Lepore argues that the age of discovery Darwin and the Space Age turned ideas about life on earth topsy turvy New worlds were found she writes and old paradises were lost As much a meditation on the present as an excavation of the past The Mansion of Happiness is delightful learned and altogether

Making an Exit Sarah Murray, 2024-08-06 Thoughtful amusing and provocative Making an Exit will transform the way you look at life s last passage Because as Murray discovers death is for many not an ending but the start of something new Author and journalist Sarah Murray never gave much thought to what might ultimately happen to her remains that was until her father died While he d always insisted that the organic matter left after a person takes their last breath had no significance he surprised his family by setting down elaborate arrangements for the scattering of his own ashes This unexpected last request prompted Murray to embark on a series of voyages to discover how our end is commemorated around the globe and how we approach our own mortality Spanning continents and centuries Making an Exit is Murray s exploration of the extraordinary creativity unleashed when we seek to dignify the dead Along the way she encounters a cremation in Bali in which two royal personages are placed in giant decorative bulls and consigned to the afterlife in a burst of flames a chandelier in the Czech Republic made entirely from human bones a weeping ceremony in Iran and a Philippine village where the casketed dead are left hanging in caves She even goes to Ghana to commission her own fantasy coffin The accounts of these journeys are fascinating poignant and funny But this is also a very personal quest on her travels Murray is seeking inspiration for her own eventual send off

Living Pictures, Missing Persons Mark B. Sandberg, 2021-10-12 In the late nineteenth century Scandinavian urban dwellers developed a passion for a new utterly modern sort of visual spectacle objects and effigies brought to life in astonishingly detailed realistic scenes The period 1880 1910 was the popular high point of mannequin display in Europe Living Pictures Missing Persons explores this phenomenon as it unfolded with the rise of wax museums and folk museums in the largest cities of Denmark Sweden and Norway Mark

Sandberg asks Why did modernity generate a cultural fascination with the idea of effigy He shows that the idea of effigy is also a portal to understanding other aspects of visual entertainment in that period including the widespread interest in illusionistic scenes and tableaux in the portability of sights spaces and entire milieus Sandberg investigates this transformation of visual culture outside the usual test cases of the largest European metropolises He argues that Scandinavian spectators desired an unusual degree of authenticity a cultural preference for naturalism that made its way beyond theater to popular forms of museum display The Scandinavian wax museums and folk ethnographic displays of the era helped pre cinematic spectators work out the social implications of both voyeuristic and immersive display techniques This careful study thus anticipates some of the central paradoxes of twentieth century visual culture but in a time when the mannequin and the physical relic reigned supreme and in a place where the contrast between tradition and modernity was a high stakes game

In a Strange Room David Sherman, 2014-03-10 Literary modernism emerged as death stripped in the developing world of traditional meanings and practices became strange The sea change over the first part of the twentieth century in how people died and tended corpses the modernization of death was a crucial context in which modernist writers developed their new novelistic and poetic techniques They sought ways to renovate mortal obligations in an age of the obsolescence of the dead For many years the flesh and blood body has been a central protagonist in literary scholarship the body in pain the body as spectacle and performance embodiments of social identity but the body in its mortality as corpse has not received sustained critical attention Filling this gap *In a Strange Room* investigates modernism's preoccupation with corpses death rituals and the ethical demands the dead make on the living who survive them Informed by insights from psychology anthropology political theory and philosophy David Sherman shows how modernist aesthetics sought to reanimate the complex meanings and values of dead bodies during an era of their efficient medical administration and hygienic disposal The modernist imagination reckoned with the processes by which the modern corpse became a secularized object increasingly subject to scientific inquiry governmental regulation specialized medical technologies and new forms of market exchange Chapters explore representations of state power over the war dead in Virginia Woolf and Wilfred Owen the narrative problem of the unburied corpse in *As I Lay Dying* and Ulysses mortal obligation as erotic desire in Eliot's *The Waste Land* and Djuna Barnes's *Nightwood* and mortuary pedagogies embedded in elegies by Wallace Stevens and William Carlos Williams Gathering examples from fiction poetry and the visual arts *In a Strange Room* considers the changing relationship between aesthetics and mortality during the first half of the twentieth century New attitudes toward dying and dead bodies demanded modernism's strange bracing ways of representing ethics at the limits of life

The Bioarchaeology of Mummies Kenneth C. Nystrom, 2018-09-03 The modern manifestation of mummy studies began to take shape in the 1970s and has experienced significant growth during the last several decades largely due to biomedical interest in soft tissue pathology Although this points to a vibrant field there are indications that we need to take stock of where it is today and how

it may develop in the future and this volume responds to those demands In many ways mummy studies and skeletal bioarchaeology are sister disciplines sharing data sources methodologies and practitioners Given these close connections this book considers whether paradigmatic shifts that influenced the development of the latter also impacted the former Whilst there are many available books discussing mummy research most recent field wide reviews adopt a biomedical perspective to explore a particular mummy or collection of mummies The Bioarchaeology of Mummies is a unique attempt at a synthetic state of the field critical analysis which considers the field from an explicitly anthropological perspective This book is written for both skeletal bioarcheologists that may not be familiar with the scope of mummy research and mummy researchers from biomedical fields that may not be as acquainted with current research trends within bioarchaeology **Inked: Tattoos and**

Mortal Remains Nancy Isenberg, Andrew Burstein, 2012-07-05 Mortal Remains introduces new methods of analyzing death and its crucial meanings over a 240 year period from 1620 to 1860 untangling its influence on other forms of cultural expression from religion and politics to race relations and the nature of war In this volume historians and literary scholars join forces to explore how in a medically primitive and politically evolving environment mortality became an issue that was inseparable from national self definition Attempting to make sense of their suffering and loss while imagining a future of cultural permanence and spiritual value early Americans crafted metaphors of death in particular ways that have shaped the national mythology As the authors show the American fascination with murder dismembered bodies and scenes of death the allure of angel sightings the rural cemetery movement and the enshrinement of George Washington as a saintly father constituted a distinct sensibility Moreover by exploring the idea of the vanishing Indian and the brutality of slavery the authors demonstrate how a culture of violence and death had an early effect on the American collective consciousness Mortal Remains draws on a range of primary sources from personal diaries and public addresses satire and accounts of sensational crime and makes a needed contribution to neglected aspects of cultural history It illustrates the profound ways in which experiences with death and the imagery associated with it became enmeshed in American society politics and culture

The Whole Death Catalog Harold Schechter, 2009-06-02 In the tradition of Mary Roach s bestselling Stiff and Jessica

Mitford's classic exposé *The American Way of Death* comes this meticulously researched refreshingly irreverent and lavishly illustrated look at death from acclaimed author Harold Schechter. With his trademark fearlessness and bracing sense of humor, Schechter digs deep into a wealth of sources to unearth a treasure trove of surprising facts, amusing anecdotes, practical information, and timeless wisdom about that undiscovered country to which we will all one day travel. Topics include: Death anxiety: is your fear of death normal or off the scale? You can't take it with you or can you? Wacky wills and bizarre bequests. The hospice experience: going out in comfort and style. Deathbed and funeral etiquette: how to help the dying and mourn the dead with dignity. Death on demand: why the right to die movement may be the next big thing. Goodbye everybody: famous last words. The embalmer's art: all dressed up and nowhere to go. Behind the scenes at your local funeral home. Alternative burial choices: from coral reefs to outer space. From the cold, hard facts of death to lessons in the art of dying well, from what happens in the body's last living moments to what transpires in the ground or in the furnace, from near-death experiences to speculation on the afterlife, *The Whole Death Catalog* leaves no gravestone unturned.

Did They Rest in Peace? Joseph William Lewis Jr., M.D., 2018-10-18. Ashes to ashes, dust to dust. By what miracle can an assortment of seemingly unrelated particles come together and correctly assemble to form a human being? Amazingly, once aggregated, these atoms, molecules, and compounds manage to interact reasonably coherently during our lives but seek to return to their dusty state when death occurs. Of the billions of our species who have existed on earth over the millennia, most have quietly and inexorably returned to ashes and dust when their term of life expired. This book tracks some of the misadventures of selected corpses, including burials that went awry, body snatching, exhumations, human relic collection, and assorted desecrations. Over the years, it seems that a remarkable number of bodies have failed to enjoy the admonition to Rest in Peace. Whether these aberrations in the burial process have disturbed the afterlife of the departed, everyone is dying to discover the answer.

Encouraging and Supporting Student Inquiry Harriet S. Selverstone, 2007-09-30. Assignments that engage students in inquiry topics of their own choosing contribute to motivation and thus to learning. Very often, the topics chosen, particularly by high school students, are considered controversial by school administration, parents, community organizations, and others. This practical book discusses the processes, actions, and policies needed to support and encourage high school students in that type of inquiry. Building trusting relationships over time with administration and the school community will be stressed as a way to build a community of true inquiry in your school and library. Classroom teachers and high school librarians will value the advice and scaffolding techniques presented that will enable their school and high school library to become a safe place for student inquiry into issues of their own choosing, controversial or not. The author draws on her 30-plus years as a high school librarian, deeply concerned with the intellectual freedom of the researchers in her library media center and with offering help and reassurance to those trying to implement school library programs that allow all voices to be heard. Grades 9-12.
