Servant Leadership and Moral Courage in Canadian Nursing Lawrence Onwuegbuchunam,2020-03-13 This book explored the empirical works on servant leadership and underscored the qualities of servant leadership such as empathy listening awareness healing conceptualization stewardship persuasion foresight building community and commitment to the growth of people as better aligned with the values of Canadian nursing practice among other leadership styles and theories Although the origin of the phrase servant leadership was coined by Robert Greenleaf in 1977 it is a fundamental flaw not to mention that the qualities and values of servant leadership model have been in existence in nursing from time immemorial The philosophy of servant leadership is not fundamentally and essentially both distant and distinct from what nurses do in their care of patients Since servant leadership is grounded in ethical and moral principles this book explored the practicality and the relevancy of servant leadership as well as the role of moral courage in creating healthy workplace that could transform both Canadian nursing practice and Canadian healthcare system

unprepared for the constant stream of emotional and psychological stressors that come with this profoundly important work. The unintended consequences of this omission include burnout, toxic work environments, and exodus from the profession. In this highly anticipated and particularly timely third edition of *Reflective Practice*, authors Sara Horton Deutsch and Gwen Sherwood invite readers to reflect, recalibrate, reimagine, rethink, and reframe the work of nursing care and their various roles and relationships within it. This book focuses first on the individual, then practice settings, and finally systems and communities, while providing supporting theoretical frameworks, practical applications, and opportunities for personal and shared reflection along the way. *Reflective Practice* guides nurses to emotional and psychological fulfillment in all aspects of care.
