in order to be able to keep abreast of this demanding and changing specialty The book met the authors objectives Text chapters provide the reader with a thorough discussion of the issues The special features found in the text on standards of patient care patient teaching guides and quality improvement tools are very helpful to the reader According to the author the book is written for oncology nurses and oncology nursing students I agree with the authors targeted audiences This book is specifically written for nurses in order to help them gain an understanding of the disease process medical management nursing implications and teaching needs of patients Both of the authors of this text are credible authorities on the subject matter presented Miaskowski has had a wide variety of oncology nursing experience and is currently professor and chair of the Department of Physiologic Nursing at UCSF Buchsel is recognized as an expert in the nursing care of bone marrow and stem cell transplantation She is currently a clinical instructor at the University of Washington School of Nursing Education and is an oncology nurse consultant The principles of cancer and current treatment modalities are covered in this book Trends in surgical radiation chemotherapy and biotherapy are written about in detail In addition nurses are able to review the clinical implications and nursing management of patients undergoing disease specific treatment The information on patient home care needs and patient teaching guides is very helpful All aspects of oncology nursing care are covered in this text including psychosocial cultural and terminal care issues Tables and diagrams are appropriate and useful One shortcoming of the text of note is that all diagrams appear in black and white This is a very useful and comprehensive reference for oncology nurses Providing the reader with nursing standards of care and patient teaching information are additional valuable features of this book This book is well written and compares favorably with other books in the field such as Groenwald s Cancer Nursing Principles and Practice 4th Edition Jones and Bartlett 1997 83 100 Stacen Keating RN BSN Mount Sinai Hospital and Medical Center Copyright 2006 Doody Reviews *Nursing Care of the Cancer Patient* Rosemary Bouchard, Norma F. Wilkes, Karen Ingwersen, 2002 This book supplements other oncology nursing textbooks and provides hands on information to assist the nurse in providing comprehensive care to patients receiving chemotherapy and to their families The focus of the text is on the chemotherapeutic agents their side effects the corresponding nursing diagnoses and care plans and states methods of administration and handling of these drugs **Nursing Care of the Cancer Patient** Genevieve M. Fitzpatrick, 1971 Nursing Care Standards for Cancer Patients Hanaa Sabra, Harris El Shemy, Hala Youssef, 2014-03 Quality of care that is expected from a health care facility is made explicit by written standards that direct the way the service is to be provided and the results should be achieved from that service Nursing care Standards must be available to all nursing personnel to serve as guide for professional work Standard is a descriptive professional statement of desired or agreed level of performance care against which the level of performance care can be judged It must be observable achievable and measurable The patient s ability to cope with chemotherapy will be influenced by knowledge of the treatment and

realistic expectations of side effects Therefore Nurses play a vital role regarding cancer patients in order to help them to cope and adapt to their illness This role includes monitoring acute reaction and follow up care of these patients providing education counseling and support as the patients facing change in their life In an attempt to help nurses to develop their knowledge improving their practice with new technology and to provide good quality nursing care for cancer patients this requires development and applying nursing care standards in oncology units
