The Shaft Graves and Other Late Helladic I and II Remains
Michael Lindblom, 2025-04-01 This volume presents funerary and domestic remains from the Late Helladic LH period at the settlement of Lerna an important prehistoric site on the Gulf of Argos excavated by the ASCSA in the 1950s Most of the material derives from the fill of two disturbed shaft graves from the later half of the LH I period whose large ceramic and faunal assemblages are complemented by finds from an additional nine graves and domestic remains Stratigraphic analysis of the shaft graves and surrounding remains contextualize the ceramics and miscellaneous objects recorded in the accompanying catalogues Analysis of the pottery establishes a clear subdivision of LH I table ware into two phases and suggests a close relationship between kin groups at Lerna and at Kolonna on Aigina Contributions by Sturt Manning on radiocarbon dating of the shaft grave fills Ian Whitbread and Hans Mommsen on petrographic and chemical analysis of the pottery and David S Reese on the faunal remains shed further light on this important material The combined evidence suggests that Lerna was continually settled throughout the LH I period with decline in the early LH IIA period and abandonment in the LH IIB period While publication of intact monumental tombs often focuses on the elite occupants and

their precious grave goods the value of the Lerna shaft graves lies in what they reveal about the hundreds of living participants in the funerary rituals
