Origins And Spread Of Agriculture And Pastoralism In Eurasia:

The Origins and Spread of Agriculture and Pastoralism in Eurasia David Russell Harris, 1996 First published in 1996 Routledge is an imprint of Taylor Francis an informa company *The Origins And Spread Of Agriculture And Pastoralism In Eurasia* David R. Harris, 2024-11-01 As the first book to examine the origins and spread of agriculture and pastoralism in Europe and Asia as a whole this major contribution should be essential reading for archaeologists anthropologists biologists and geographers Adopting a novel approach to the subject the authors examine it first in terms of seven different disciplinary perspectives social ecological genetic linguistic biomolecular epidemiological and geographical Then 20 case studies are presented which are based primarily on archaeological and biological evidence and which relate to three major regions Southwest Asia Europe and Central Asia to the Pacific The book concludes with an overview of Eurasia as a whole The transition from hunting and gathering to agriculture had revolutionary consequences for human society It led to the emergence of urban civilizations and ultimately to humanity's almost complete dependence on relatively few domesticated animals and plants The subject has been much studied but the results have tended to be interpreted largely in terms of local cultural sequences with insufficient comparison made with evidence from other areas In contrast this book provides a continental scale framework with its scope extended to pastoralism because in Eurasia both the raising of livestock and the cultivation of crops were integral components of the agricultural revolution from its inception some 10 000 years ago Comprehensive and authoritative *The Origins and Spread of Agriculture and Pastoralism in Eurasia* should appeal strongly to the wide readership of students and specialists concerned with the prehistoric antecedents of modern civilization

ORIGINS & SPREAD AGRIC PAST HARRIS DAVID R, 1996-04-17 The transitions from hunting and gathering to agriculture had revolutionary consequences for human society leading to the emergence of urban civilizations and ultimately to humanity's dependence on relatively few domesticated animals and plants Though the subject has been studied extensively results have typically been interpreted in terms of local cultural sequences By contrast *The Origins and Spread of Agriculture and Pastoralism in Eurasia* provides a continental scale framework for examining the agricultural revolution from its inception nearly 10 000 years ago Back cover **Europe's First Farmers** T. Douglas Price, 2000-09-14 Essays by leading specialists on a central issue of European history the transition to farming *The Emergence of Agriculture* Peter White, Timothy Denham, 2020-10-25 This volume the first in the One World Archaeology series is a compendium of key papers by leaders in the field of the emergence of agriculture in different parts of the world Each is supplemented by a review of developments in the field since its publication Contributions cover the better known regions of early and independent agricultural development such as Southwest Asia and the Americas as well as lesser known locales such as Africa and New Guinea Other contributions examine the dispersal of agricultural practices into a region such as India and Japan and how introduced crops became incorporated into pre-existing forms of food production This reader is intended for students of the

archaeology of agriculture and will also prove a valuable and handy resource for scholars and researchers in the area *The Ancient Indus Valley* Jane R. McIntosh, 2007-11-12 This work is a revealing study of the enigmatic Indus civilization and how a rich repertoire of archaeological tools is being used to probe its puzzles The Ancient Indus Valley New Perspectives takes readers back to a civilization as complex as its contemporaries in Mesopotamia and Egypt one that covered a far larger region yet lasted a much briefer time less than a millennium and left few visible traces Researchers have tentatively reconstructed a model of Indus life based on limited material remains and despite its virtually indecipherable written record This volume describes what is known about the roots of Indus civilization in farming culture as well as its far flung trading network sophisticated crafts and architecture and surprisingly war free way of life Readers will get a glimpse of both a remarkable piece of the past and the extraordinary methods that have brought it back to life

The Origin and Evolution of Cultures Los Angeles Robert Boyd Professor of Anthropology University of California, Davis Peter J. Richerson Professor of Environmental Science and Policy University of California, 2004-12-22 Oxford presents in one convenient and coherently organized volume 20 influential but until now relatively inaccessible articles that form the backbone of Boyd and Richerson's path breaking work on evolution and culture Their interdisciplinary research is based on two notions First that culture is crucial for understanding human behavior unlike other organisms socially transmitted beliefs attitudes and values heavily influence our behavior Secondly culture is part of biology the capacity to acquire and transmit culture is a derived component of human psychology and the contents of culture are deeply intertwined with our biology Culture then is a pool of information stored in the brains of the population that gets transmitted from one brain to another by social learning processes Therefore culture can account for both our outstanding ecological success as well as the maladaptations that characterize much of human behavior The interest in this collection will span anthropology psychology economics philosophy and political science

The Origin and Evolution of Cultures Robert Boyd, Peter J. Richerson, 2005-01-20 The Origin and Evolution of Cultures presents articles based on two notions That culture is crucial for understanding human behaviour and that culture is part of biology Interest in this collection will span anthropology psychology economics philosophy and political science

Sorghum C. Wayne Smith, Richard A. Frederiksen, 2000-12-25 The newest addition to the Wiley Series in Crop Science this book is an all in one guide to sorghum one of the eight major grain crops grown worldwide While presenting information in adequate detail for scientists it is also an invaluable reference for growers processors and grain merchants

Agricultural and Pastoral Societies in Ancient and Classical History Michael Adas, 2001 Introduces readers to the cross cultural study of ancient and classical civilizations The book is divided into two sections the first examining the ongoing interaction between ancient agrarian and nomadic societies and the second focusing on regional patterns in the dissemination of ideas **Ancient Pakistan - An Archaeological History** Mukhtar Ahmed, 2014-10-15 This book is the

second volume of a much larger project Ancient Pakistan An Archaeological History which deals with the prehistory of Pakistan from the Stone Age to the end of the Indus Civilization ca 1500 BC This particular volume A Prelude to Civilization is concerned with the beginning of agriculture sedentary living and the emergence of village farming communities in the Greater Indus Valley leaving the reader at the threshold of the Harappan Civilization The material is generously illustrated with a large number of maps tables drawings and photographs A comprehensive bibliography is provided for those who want to dig deeper into the subject *The Holocene* Neil Roberts, 2014-02-03 The Holocene provides students researchers and lay readers with the remarkable story of how the natural world has been transformed since the end of the last Ice Age around 15 000 years ago This period has witnessed a shift from environmental changes determined by natural forces to those dominated by human actions including those of climate and greenhouse gases Understanding the environmental changes both natural and anthropogenic that have occurred during the Holocene is of crucial importance if we are to achieve a sustainable environmental future Revised and updated to take full account of the most recent advances the third edition of this classic text includes substantial material on the scientific methods that are used to reconstruct and date past environments as well as new concepts such as the Anthropocene The book is fully illustrated global in coverage and contains case studies a glossary and more than 500 new references **Rethinking Agriculture** Timothy P Denham, José Iriarte, Luc

Vrydaghs,2016-07 Although the need to study agriculture in different parts of the world on its own terms has long been recognized and re affirmed a tendency persists to evaluate agriculture across the globe using concepts lines of evidence and methods derived from Eurasian research However researchers working in different regions are becoming increasingly aware of fundamental differences in the nature of and methods employed to study agriculture and plant exploitation practices in the past Contributions to this volume rethink agriculture whether in terms of existing regional chronologies in terms of techniques employed or in terms of the concepts that frame our interpretations This volume highlights new archaeological and ethnoarchaeological research on early agriculture in understudied non Eurasian regions including Island Southeast Asia and the Pacific the Americas and Africa to present a more balanced view of the origins and development of agricultural practices around the globe The Convergent Evolution of Agriculture in Humans and Insects Ted R Schultz,Richard

Gawne,Peter N Peregrine,2022-02-22 Contributors explore common elements in the evolutionary histories of both human and insect agriculture resulting from convergent evolution During the past 12 000 years agriculture originated in humans as many as twenty three times and during the past 65 million years agriculture also originated in nonhuman animals at least twenty times and in insects at least fifteen times It is much more likely that these independent origins represent similar solutions to the challenge of growing food than that they are due purely to chance This volume seeks to identify common elements in the evolutionary histories of both human and insect agriculture that are the results of convergent evolution The goal is to create a new synthetic field that characterizes quantifies and empirically documents the evolutionary and ecological mechanisms that drive both human and nonhuman agriculture The contributors report on the results of quantitative analyses comparing human and nonhuman agriculture discuss evolutionary conflicts of interest between and among farmers and cultivars and how they interfere with efficiencies of agricultural symbiosis describe in detail agriculture in termites ambrosia beetles and ants and consider patterns of evolutionary convergence in different aspects of agriculture comparing fungal parasites of ant agriculture with fungal parasites of human agriculture analyzing the effects of agriculture on human anatomy and tracing the similarities and differences between the evolution of agriculture in humans and in a single relatively well studied insect group fungus farming ants **The Neolithisation of Iran** Hassan Fazeli

Nashli,2013-12-11 The period c 10 000 5000 BC witnessed fundamental changes in the human condition with societies across the Fertile Crescent shifting their alignment from millennia old practices of seasonally mobile hunting and foraging to year round sedentism plant cultivation and animal herding The significant role of Iran in the early stages of this transition was recognised more than half a century ago but has not been to the fore of academic consciousness in recent decades In the meantime investigations into Neolithic transformation have proceeded apace in all other regions of the Fertile Crescent and beyond Here 18 studies attempt to redress that balance in re assessing the role of Iran in the early neolithisation of human societies These studies many of them by Iranian scholars consider patterns of change and or continuity across a variety of

topographical landscapes investigate Neolithic settlement patterns the use of caves animal exploitation and environmental indicators and present new insights into some well known and some newly investigated sites The results re affirm the formative role of this region in the transition to sedentary farming Exploring Agrodiversity H. C. Brookfield,2001 Small farmers are often viewed as engaging in wasteful practices that wreak ecological havoc Exploring Agrodiversity sets the record straight Small farmers are in fact ingenious and inventive and engage in a diverse range of land management strategies many of them resourcefully geared toward conserving resources especially soil Using case studies from Africa Asia Latin America and the Pacific this book provides in depth analysis of agricultural diversity and explores its history **From Foragers to Farmers** Ehud Weiss,2009-08-01 This volume celebrates the career of archaeobotanist Professor Gordon C Hillman Twenty eight papers cover a wide range of topics reflecting the great influence that Hillman has had in the field of archaeobotany Many of his favourite research topics are covered the body of the text being split into four sections Personal reflections on Professor Hillman s career archaeobotanical theory and method ethnoarchaeological and cultural studies and ancient plant use from sites and regions around the world The collection demonstrates as Gordon Hillman believes that the study of archaeobotany is not only valuable but vital for any study of humanity
